Preface

ERFC forecasting structure and schedule

The Economic and Revenue Forecast Council is required by Chapter 231, Section 34, Laws of 1992 (RCW 82.33.020) to prepare a quarterly state economic and revenue forecast and submit it to the Forecast Council. This report presents the state's economic and General Fund-State revenue forecast. It is issued four times a year. The Washington State GF-S revenue forecast is prepared guarterly in conjunction with the state economic forecast for the Economic and Revenue Forecast Council. The Council consists of seven members, two appointed by the Governor, four appointed by the Legislature – one from each caucus of the Senate and House of Representatives, and the State Treasurer. Current members of the Economic and Revenue Forecast Council are listed inside the front cover of this publication. The GF-S revenue forecast is updated four times per year: March (February in evennumbered years), June, September, and November. The staff of the Economic and Revenue Forecast Council is responsible for the preparation of the state's economic forecast and the forecast of the Department of Revenue's GF-S revenue sources as well as GF-S revenue from fines and forfeitures collected by the Administrative Office of the Courts with GF-S share of court fees, fines, and forfeitures. The staff is also responsible for review and coordination of the revenue forecasts of other agencies that collect relatively large amounts of GF-S revenue. These are the Department of Licensing, the Office of the Insurance Commissioner, the Lottery Commission, the State Treasurer, the Liquor and Cannabis Board, and the Office of Financial Management. The Office of Financial Management is responsible for summarizing the forecasts of all other state agencies that collect relatively smaller amounts of GF-S revenue.

Forecast Procedure

For each quarterly update, the staff of the Economic and Revenue Forecast Council, under the direction of the Executive Director, reviews (and if warranted, modifies) a national economic forecast prepared by IHS Markit. A state economic forecast is then prepared using an econometric model that links Washington's economy to the national economy. After review by forecast workgroups; the Governor's Council of Economic Advisors; and the Economic and Revenue Forecast Council, this state economic forecast (updated for newly released data) is used to prepare a baseline revenue forecast for GF-S and the related funds. The forecasts are based on current law and administrative practices and do not reflect pending legal challenges to GF-S receipts until they are resolved. Additionally, at least two alternative forecasts are prepared for all GF-S and related fund sources and presented to the Forecast Council for approval. Once the Council approves the forecast, it becomes the official forecast of GF-S and related fund revenues.

Data in this publication are accurate through October 12, 2023.

Executive Summary

- The economy continues to recover, although inflation remains high.
- The forecast for GDP growth in 2023 is now 2.1%, up from 1.2% in the June forecast. For 2024, real GDP growth is 1.0%, up from 0.7% in the June forecast. For 2025 through 2027, we expect growth rates of 2.0%, 2.0%, and 1.9%, unchanged from the June forecast.
- Oil prices have increased.
- The Washington economy continued to expand through the middle of 2023.
- Washington employment growth in June, July and August was more than expected in the June forecast.
- The Washington unemployment rate has remained at 3.6% since July.
- Washington housing construction slowed in the second quarter of 2023.
- Seattle home prices increased in July for a fourth consecutive month.
- Washington exports decreased 9.1% from the second quarter of 2022 to the second quarter of 2023.
- Seattle consumer price inflation outpaced the national average in the year ending in August 2023.
- Tracked revenue collections since June have come in above their forecasted amounts, with most of the surplus in Revenue Act taxes (the main category of GF-S taxes including retail sales and use, business and occupation, public utility and non-cigarette tobacco products).
- New data on taxable activity in the second quarter of 2023 indicate that underlying taxable activity for Revenue Act taxes was higher than expected in June. This has led to increases in forecasted Revenue Act taxes.
- Forecasted real estate excise taxes have also increased slightly due to higherthan-forecasted taxable activity.
- About half of the increase in tallied revenue for the 2021-23 biennium came from large payments of estate taxes that went to the Education Legacy Trust Account.
- The total forecast for funds subject to the budget outlook process was increased by \$265 million in the 2021-23 biennium, \$663 million in the 2023-25 biennium and \$437 million in the 2025-27 biennium.

U.S. Economic Forecast

The economy continues to recover	The economy continues to recover, although inflation remains high. Economic growth recovered quickly from the pandemic with the help of fiscal and monetary policy. Strong demand fueled by policy responses, combined with ongoing supply issues caused inflation to spike and stay elevated. The Federal Reserve is attempting to combat inflation by raising interest rates, although this threatens to slow economic growth. New COVID- 19 cases have diminished and the pandemic is no longer materially impacting the economy.
<i>Our forecast was based on a modified version of the September S&P Global Market Intelligence forecast</i>	This forecast is based on a modified version of S&P Global Market Intelligence's (formally IHS Markit) September 2023 Control forecast for the U.S. economy. We have adjusted real gross domestic product (GDP) to match the September 2023 Blue Chip "Consensus" GDP forecast for 2023 and 2024. The forecast for GDP growth in 2023 is now 2.1%, up from 1.2% in the June forecast (see Figure 1.4). For 2024, real GDP growth is 1.0%, up from 0.7% in the June forecast. The forecast calls for one quarter of slightly negative growth in the first quarter of next year. For 2025 through 2027, we expect growth rates of 2.0%, 2.0%, and 1.9%, unchanged from the June forecast.
<i>Oil prices have increased since the June forecast</i>	Oil prices have increased sharply since June. Supply cuts by OPEC+ and rising demand have outweighed concerns about inflation and weak economic growth. Russia and Saudi Arabia extended output cuts totaling 1.3 million barrels per day in September. The refiner acquisition price of crude oil in 2023 is expected to average \$80 per barrel, up from \$71 per barrel assumed in June. Even with the increase, oil prices are still expected to be lower than the \$95 per barrel in 2022. We expect oil prices to increase to \$83 per barrel in 2024 as the expected economic slowdown is less severe than previously anticipated and supply remains tight. Going forward, supply constraints are expected to diminish, and increased U.S. production will keep prices somewhat in check as demand recovers. We expect oil prices to decline to \$76 per barrel in 2025 and decline throughout the forecast reaching \$68 per barrel in 2027. The June forecast expected oil prices to reach \$61 per barrel in 2027.

Washington Economic Forecast

The Washington economy continued to expand through the middle of 2023 The Washington economy continued to expand through the first two quarters of 2023. Washington employment growth in June, July and August was more than expected in the June forecast. In August, the Washington unemployment rate remained low at 3.6%, unchanged since July. Washington housing construction slowed in the second quarter of 2023. Seattle home prices increased in July for a fourth consecutive month. Washington exports decreased 9.1% from the second quarter of 2022 to the second quarter of 2023. Seattle consumer price inflation outpaced the national average in the year ending in August 2023.

The Washington forecast features a higher level of nominal personal income The Washington forecast features a higher level of nominal personal income throughout the forecast period compared to the June forecast and little change in the employment forecast. We expect a 6.5% increase in nominal Washington personal income this year, up from 4.8% in the June forecast. This has the effect of raising the level of the personal income forecast through 2027, although annual growth rates for 2024 – 2027 average 5.2%, the same as in June. We expect a 2.3% increase in Washington employment this year, up from the 2.1% growth rate expected in the June forecast. We expect employment growth to average 0.7% per year in 2024 through 2027, unchanged from the June forecast. We expect housing permits to total 40,400 units this year, unchanged from the June forecast, and we expect permits to average 44,300 units in 2024 through 2027, up from 44,100 units in the June forecast. We expect the Seattle headline inflation to be 5.8% this year, unchanged from the June forecast. We expect Seattle headline inflation to average 2.1% per year in 2024 through 2027, unchanged from the June forecast.

Revenue Forecast

Revenue act and real estate excise tax collections were stronger than expected in June, leading to increases in forecasted revenue	Tracked revenue collections since June have come in above their forecasted amounts, with most of the surplus in Revenue Act taxes (the main category of GF-S taxes including retail sales and use, business and occupation, public utility and non-cigarette tobacco products). New data on taxable activity in the second quarter of 2023 indicate that underlying taxable activity for Revenue Act taxes was higher than previously expected, leading to an increase in forecasted taxes. Real estate excise taxes also came in higher than forecasted, resulting in slight forecast increases. The initial tally of revenue for the recently ended 2021-23 biennium is substantially higher than forecasted due to both Revenue Act taxes and unusually large payments of estate taxes into the Education Legacy Trust Account.
Total forecast	Forecasted revenue for funds subject to the budget outlook
change by	process was increased by \$265.0 million for the 2021-23
biennium	biennium, \$663.4 million in the 2023-25 biennium and \$437.4
(millions):	million in the 2025-27 biennium. The September 2023 forecast
21-23: +\$265	for these funds total \$64,751.7 million in the 2021-23 biennium,
23-25: +\$663	\$66,691.9 million in the 2023-25 biennium and \$70,926.8 million
25-27: +\$437	in the 2025-27 biennium.

This page left intentionally blank.

Chapter 1: U.S. Economy – Current Conditions and Forecast

- The economy continues to recover, although inflation remains high.
- Policymakers approved trillions of dollars of fiscal and monetary support in response to the COVID-19 pandemic.
- Real GDP increased 2.1% (SAAR) in the second quarter of 2023 after increasing 2.2% (SAAR) in the first quarter of 2023.
- The job market remains strong.
- Inflation is cooling but remains high.
- Housing activity is trending down; the manufacturing sector is declining.
- Oil prices are increasing.
- The forecast calls for one quarter of slightly negative growth in the first quarter of next year.
- The forecast for GDP growth in 2023 is now 2.1%, up from 1.2% in the June forecast. For 2024, real GDP growth is 1.0%, up from 0.7% in the June forecast. For 2025 through 2027, we expect growth rates of 2.0%, 2.0%, and 1.9%, unchanged from the June forecast.
- We expect the Federal Reserve to increase the federal funds rate until reaching 5.50% to 5.75% in November 2023.
- The uncertainty in the baseline forecast is elevated due to increased economic concern regarding inflation, possible recession, the COVID-19 pandemic, and geopolitical conflicts.

Current Conditions

```
The economy
continues to
recover The economy continues to recover, although inflation remains
high. Economic growth recovered quickly from the pandemic
with the help of fiscal and monetary policy. Strong demand
fueled by policy responses, combined with ongoing supply issues
caused inflation to spike and stay elevated. The Federal Reserve
is attempting to combat inflation by raising interest rates,
although this threatens to slow economic growth. New COVID-
19 cases have diminished and the pandemic is no longer
materially impacting the economy.
```

Policymakers approved trillions of dollars of fiscal and monetary support in response to the COVID-19 pandemic. Stimulus

Policymakers approved trillions of dollars in stimulus

The fiscal

has been

massive

response to

the pandemic

related to the pandemic has been just over \$6.0 trillion in five major categories. Business support (\$1.56 trillion), income support (\$983 billion), state and local government funding (\$870 billion), direct payments (\$859 billion), and health spending (\$700 billion). The remainder of the spending is comprised of tax policy and other spending such as disaster support, higher education, and housing.

The COVID-19 relief measures were far more substantial than the fiscal response to the 2007-09 Great Recession. The American Recovery and Reinvestment Act (ARRA) of 2009 had its highest one-year cost, or peak cost, in the third year after the initial stimulus to the federal government of \$1.0 trillion. ARRA ended up costing \$787 billion over ten years. The combination of COVID-19 stimulus to date, with the inclusion of Infrastructure Investment and Jobs Act (IIJA), is expected to have a cost of \$5.7 trillion over ten years.

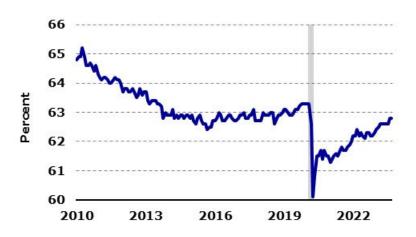

Real GDP increased by 2.1% (SAAR) in the second guarter of GDP increased 2023 after increasing 2.2% (SAAR) in the first guarter. Growth 2.1% in the was led by business investment in the second guarter as second quarter consumption slowed. Fixed investment rebounded in the second quarter, growing 5.2% (SAAR) after falling 9.0% (SAAR) in the first guarter. Fixed investment accounted for 0.90 points of overall GDP growth. Nonresidential fixed invested increased 7.4% (SAAR), with nonresidential construction leading the way with 16.1% (SAAR) growth. Equipment investment and intellectual property were both positive, growing 7.7% and 2.7% respectively. Fixed residential investment fell 2.2% (SAAR) and subtracted 0.09 points from overall GDP. Fixed residential investment has now declined for nine consecutive guarters. Exports and imports both declined, with the net impact of 0.04 points added to GDP growth. Government spending increased 3.3% (SAAR), increasing GDP by 0.57 points. Inventory accumulation had no impact on GDP growth in the second quarter.

The job market remains strong. Over three years since the The iob market unprecedented 20.7 million job decline in April 2020 due to the remains strong pandemic, employment has continued to grow (see Figure 1.1). In September, total nonfarm employment increased by 336,000 jobs. Over the past twelve months, job growth has averaged 266,000. Growth in goods producing sectors has slowed. Rising interest rates are making housing and durable goods purchases that require financing more expensive. The manufacturing sector gained 17,000 jobs in September. Construction employment increased by 11,000 as the housing market cools. Private service-providing employment increased by 234,000. Employment increases in the service sector were led by a 96,000 increase in leisure and hospitality as the sector continues to recover from deep declines related to behavioral changes since the pandemic. Health care and social assistance employment was also strong, increasing by 65,900. The only major sectors that had employment declines in September were information (-

5,000) and temporary help services (-4,200). Government payrolls increased by 73,000.

The unemployment rate is slowly increasing The unemployment rate is slowly increasing after reaching a historic low of 3.4% in January 2023. In September, the unemployment rate held steady at 3.8%. The labor force participation rate held steady as well at 62.8% in September. The rate plummeted to 60.1% during the pandemic from an initial rate of 63.3%. Since the initial recovery, the labor force participation rate has slowly improved but remains below prepandemic levels (see Figure 1.1). Average hourly earnings are up \$1.35 from a year ago to \$33.88 while the average workweek fell 0.2 hours from last year to 34.4 hours in September.

Figure 1.1: Labor Force Participation Rate

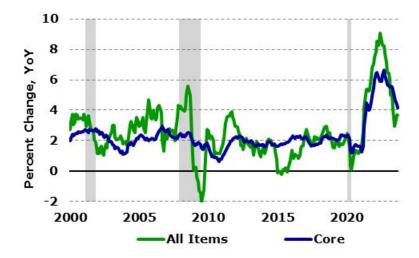

Source: U.S. Bureau of Labor Statistics; data through September 2023

Consumer confidence is once again declining after a brief uptick Consumer in the summer. Consumer confidence as measured by the confidence is Conference Board declined 5.7 points in September and is down declining 4.8 points since last year. The decline was driven by a deterioration in consumers' near-term outlook for income, business conditions, and the job market. The University of Michigan Consumer Sentiment index declined 1.9 points in September. Consumers expressed more pessimism of present conditions, although expectations did improve slightly. Near term inflation expectations fell slightly but remain elevated. Both measures remain below pre-pandemic levels. Oil prices are trending up as uncertainty to production remains Oil prices are elevated. The Brent spot crude price is now \$90 per barrel in the trending up first week of October, up from \$74 at the end of June. The West Texas Intermediate (WTI) price has increased to \$86 per barrel from \$69 per barrel over the same time period. The United States has just imposed new sanctions on Russia for illicitly selling its oil above price limits put in place in response to the Ukraine war. Saudi Arabia has stuck by its production cut, although they have pledged to help stabilize the market to curb disruption fears due to the Israel-Hamas conflict. U.S. oil

production has increased over the year and is just below its prepandemic peak. U.S. production increased to 12.991 million bpd in July, up from 12.900 million bpd in June and up from 11.834 million bpd a year ago. Prior to the pandemic, U.S. production reached 13.000 million bpd in November 2019. Even with the increase in production, the Baker Hughes rig count has been declining since reaching a peak in November 2022. As of October 6th, the rig count in the U.S. was 619, down 143 since last year and 165 since November.

Inflation is cooling but remains high Inflation is cooling but remains high (see Figure 1.2). Supply has not been able to meet the surge in demand in the wake of the pandemic. Supply chain issues due to pandemic related shutdowns contributed to the disconnect. Income support artificially boosted demand as well. Shortages of commodities have also pushed prices higher. Rents have now accelerated in lagged response to soaring home prices. Wage increases in response to higher consumer inflation have kept overall inflation more persistent. The Consumer Price Index (CPI) increased 0.4% in September from the month before, a deceleration of inflation from the 0.6% increase in August. Year-over-year, CPI was up 3.7% in September, unchanged from the prior month but down from the peak of 9.1% in June 2022. Energy prices increased 1.5% in September but are down 0.5% over the year due primarily to a sharp drop in utility gas service. Shelter cost inflation remains high, increasing 0.6% in September and up 7.2% since last year. Food prices lagged the overall increase in prices, up 0.2% since last month and up 3.7% since last year. Core consumer prices, which exclude food and energy, increased 0.3% since last month and were up 4.1% over the year.

Figure 1.2: Consumer Price Index

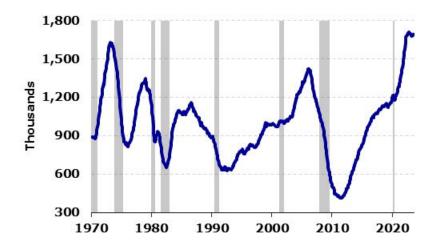

Source: Bureau of Labor Statistics; data through September 2023

Home prices are no longer declining Home prices are no longer declining. The seasonally adjusted S&P CoreLogic Case-Shiller 20-city Home Price Index increased 0.9% in July and is now up 0.1% since last year (see Figure 1.3). With inflation remaining persistently high, the Federal Reserve has raised interest rates substantially. This has led to a rapid

rise in mortgage rates which has caused affordability to plummet. The rate on a 30-year mortgage increased to 7.31% as of September 28th, up from 6.70% a year ago. Despite this, the decline in home prices appears to have ended. Lumber prices have stabilized close to pre-pandemic levels. The random length lumber price reached an all-time high \$1,671 per 1,000 board feet in May 2021. Prices have trended down and reached \$493 in early October. Homebuilder confidence had been steadily improving although it has now declined for the past two months, putting it back into negative territory. In September, confidence declined five points to 45 (readings above 50 indicate optimism), down from the recent peak of 56 in July.

Housing activity is trending down Housing activity is trending down. High interest rates, low confidence, and declining affordability have weighed down new construction. Housing starts softened in August, declining 11.3% since July and are 14.8% lower since last year. Single-family starts remain 2.4% higher than a year ago, but multi-family starts are down 7.3%. Builders are working through a large backlog of permitted but not started units and there is a near record number of housing units currently under construction (see figure 1.2). The inventory of new homes on the market is trending down, although there was an increase in the most recent data. In August there were 7.8 months' worth of supply, up from 7.0 in July, but down from a recent peak of 10.1 in July 2022. Housing permits increased 6.8% in August but are down 2.8% since last year. Single-family permits are up 7.1% since last year while multi-family permits are down 15.4%. New home sales declined 8.7% in August to 675,000 (SAAR) but are up 5.8% since last year.

Figure 1.3: Housing Units Under Construction

Source: U.S. Census Bureau; data through August 2023

The manufacturing sector is declining The manufacturing sector continued its contraction but at a slower rate. The Institute for Supply Management (ISM) Report on Business index increased to 49.0 (index values below 50 indicate contraction) in September from 47.6 in August. This is the eleventh consecutive month of contraction after a 30-month

period of expansion. The new orders component improved 2.4 points to 49.2, still indicating contraction. Production turned positive, increasing 2.5 points to 52.5. The employment component also turned positive, improving 2.7 points to 51.2. Only two of the six biggest manufacturing industries registered growth in September: food, beverage, and tobacco products and petroleum and coal products. The latest G-17 report from the Federal Reserve indicates manufacturing output improved 0.1% in August but remains down 0.6% from a year ago. Durable goods improved 0.1% and nondurable goods increased 0.2% from the month before. New orders for core capital goods (nondefense capital goods excluding aircraft) increased 0.8% in August and are up 0.2% from a year ago.

U.S. exports declined in the third quarter. Total exports in the third quarter fell 7.3% year over year, the first decline since 2020. Exports to each of the top three partner countries declined in the third guarter. Exports to Canada, Mexico, and China were down 7.3%, 3.2%, and 6.7% respectively. Oil and gas exports and petroleum and coal exports declined after exceptional growth the past two years. The value of exports in both sectors have more than doubled since the end of 2020, but declined a combined 29.1% in the third quarter. Exports of transportation equipment grew 16.4% in the third guarter and are once again the top exports by value for the United States.

Forecast

U.S. exports

declined in

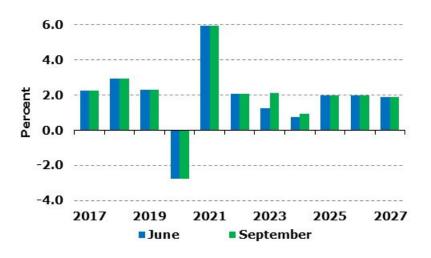

the third quarter

Our forecast was based on a modified version September S&P Global Market Intelligence forecast

This forecast is based on a modified version of S&P Global Market Intelligence's (formally IHS Markit) September 2023 Control forecast for the U.S. economy. We have adjusted real gross domestic product (GDP) to match the September 2023 Blue Chip "Consensus" GDP forecast for 2023 and 2024. The forecast for GDP growth in 2023 is now 2.1%, up from 1.2% in the June forecast (see Figure 1.4). For 2024, real GDP growth is 1.0%, up from 0.7% in the June forecast. The forecast calls for one quarter of slightly negative growth in the first guarter of next year. For 2025 through 2027, we expect growth rates of 2.0%, 2.0%, and 1.9%, unchanged from the June forecast.

of the

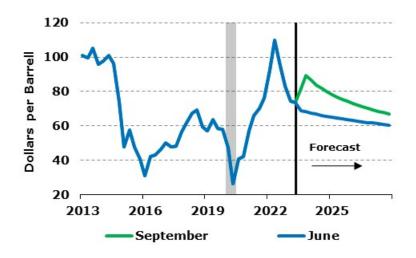

Source: U.S. Bureau of Economic Analysis, September 2023 ERFC forecast; historical data through 2022

Key assumptions are included in the forecast The forecast includes key assumptions related to fiscal policy. The debt ceiling is suspended through 2024 but is raised without incident before then. A federal fiscal year budget is passed in time to avoid a government shutdown. The forecast includes tariffs enacted by the U.S. and China since 2017 that are still in effect. The forecast reflects all legislation enacted through the time of the forecast.

Oil prices have increased sharply since June. Supply cuts by Oil prices have increased since OPEC+ and rising demand have outweighed concerns about the June inflation and weak economic growth. Russia and Saudi Arabia forecast extended output cuts totaling 1.3 million barrels per day in September. The refiner acquisition price of crude oil in 2023 is expected to average \$80 per barrel, up from \$71 per barrel assumed in June (see Figure 1.5). Even with the increase, oil prices are still expected to be lower than the \$95 per barrel in 2022. We expect oil prices to increase to \$83 per barrel in 2024 as the expected economic slowdown is less severe than previously anticipated and supply remains tight. Going forward, supply constraints are expected to diminish, and increased U.S. production will keep prices somewhat in check as demand recovers. We expect oil prices to decline to \$76 per barrel in 2025 and decline throughout the forecast reaching \$68 per barrel in 2027. The June forecast expected oil prices to reach \$61 per barrel in 2027.

Inflation (as measured by the price index for personal Inflation is consumption expenditures) is expected to fall to 3.8% this year expected to fall after peaking at 6.3% in 2022. Inflation was expected to fall to 3.7% this year in the previous forecast. Inflation has surged as demand recovered faster than could be accommodated by supplies of commodities and labor disrupted by the pandemic. Income support helped fuel the surge in demand, contributing to the increase in prices. Inflation is expected to moderate throughout the forecast, although slightly slower than expected in June. Inflation is expected to decline to 2.7% in 2024, and then average 2.0% from 2025 through 2027. Core inflation (excluding food and energy) is expected to be 4.2% this year, decline to 2.9% in 2024, and then trend down and average 2.1% in 2025 through 2027. Real consumer spending growth is expected to slow further this year as the Federal Reserve tightens monetary policy to combat Consumer inflation. Furthermore, fiscal stimulus measures are no longer spending giving a boost to consumers. Consumers experienced real growth is income declines due to high inflation last year. This year, we expected to slow expect continued wage growth and slowing inflation to turn real income growth positive. Real consumer spending is expected to grow 2.3% this year, down from 2.7% growth in 2022. The previous forecast expected growth of 1.7% this year. The forecast calls for growth to further soften in 2024 to 1.0%. We expect real spending growth to average 2.1% in 2025 through 2027. Employment growth is expected to slow. Employment grew 4.3% Employment in 2022 after growing 2.9% in 2021. We expect employment arowth is growth of 2.2% this year as the economy cools. The forecast expected to then calls for a decline of 0.1% in 2024. The previous forecast slow expected growth of 2.2% this year followed by a 0.2% decline in 2024. Employment is expected to grow 0.1% in 2025 and then grow 0.4% per year in 2026 and 2027. The forecast expects the labor market to remain tight and the unemployment rate to

Source: EIA, September 2023 ERFC forecast; historical data through 2023 Q2

remain at a historic low of 3.6% this year. The forecast calls for the unemployment rate to peak at 4.3% in 2025 before declining to 4.1% in 2027.

Business investment is expected to be stronger than in June

The housing market outlook remains weak but has improved since June

Growth in major U.S. trading partners is expected to be stronger this year than in the previous forecast Real nonresidential fixed investment growth is expected to slow to 3.0% this year after a 3.9% increase in 2022. The June forecast expected a 2.3% increase this year. Demand is expected to soften in line with slower overall GDP growth, lessening the need to expand production capacity. Borrowing costs remain high, reflecting tight monetary policy by the Federal Reserve. Office vacancy rates remain high as workers continue to use flexible work environments. Real nonresidential fixed investment growth is expected to increase 1.0% in 2024 and then pick up and reach 3.0% in 2027. We expect real nonresidential construction to grow 8.1% this year after declining in each of the prior three years. The forecast calls for nonresidential construction to grow slightly over the following two years at 0.8% and 0.2%. We then expect growth of 2.4% in 2026 and 2027 as some excess surplus gets worked through. However, real nonresidential construction will not have fully recovered to its level before the pandemic by the end of 2027. Real equipment investment is expected to decline 0.9% this year after growing 4.3% in 2022. We expect real equipment investment growth to turn positive in 2024 at 0.9%. We then expect growth to accelerate and reach 4.5% in 2027.

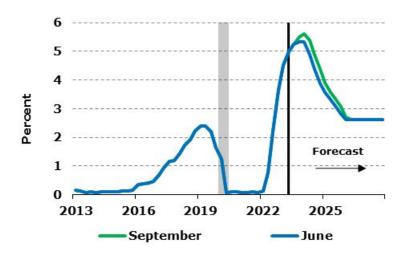

The housing market outlook remains weak although it has improved slightly since the previous forecast. High mortgage rates have lowered affordability and weighed down housing demand. High mortgage rates have also lowered supply by locking in homeowners holding mortgages financed at lower rates. Labor and material shortages remain, causing delays in finished construction. The September forecast calls for housing starts to decline 8.7% this year, down from a 12.2% decline in the previous forecast. We expect single-family and multi-family housing to decline at a similar rate. We expect total housing starts to decline another 4.9% in 2024, reaching a trough of 1.35 million units. The forecast then calls for housing starts to return to growth in 2025 at 6.3% with growth in both single-family and multi-family. We expect housing starts to grow another 1.0% in 2026 before a decline of 0.7% in 2027.

Economies throughout the world continue to recover from the COVID-19 pandemic. Economic growth of U.S. major trading partners is expected to slow this year to 2.1% from 3.4% in 2022, unchanged since the June forecast. Economic performance will vary widely across regions, with Europe and the Americas experiencing subpar growth and emerging markets of Asia-Pacific and parts of Africa achieving robust growth. China's economy has weakened in recent months and has yet to rebound back to pre-Covid levels. We expect growth in U.S. major trading partners to average 2.4% in 2024 through 2027, down slightly from the 2.5% average growth expected in the June forecast. Real U.S. exports are forecasted to slow to 2.8% this year, down from 7.1% growth in 2022. The previous forecast

expected real export growth to slow to 3.2% this year. We expect real export growth to increase and average 4.2% in 2024 through 2027.

The Fed Funds rate is expected to peak at 5.50% to 5.75% The Federal Reserve will continue to raise interest rates as it strives to lower inflation to 2%. The Federal Reserve raised the target for the federal funds another 25 basis points in July, but then paused the rate increases in September. Inflation has remained high for longer than policymakers had anticipated. The economy has remained resilient with the labor market particularly tight, even as the Federal Reserve has raised rates. Our expectation is for a final 25 basis point hike in November during this cycle. We expect the federal funds rate to reach 5.50% to 5.75% (see Figure 1.6). We then expect the Federal Reserve to hold the rate steady until the second quarter 2024 when rates are slowly lowered. The rate cuts are expected to end in the first guarter of 2025 and then hold steady through 2027 at 2.50% to 2.75%. The forecast also calls for the Federal Reserve to continue removing stimulus tied to its balance sheet, allowing it to decline by about a third through 2024.

Figure 1.6: Fed Funds Target Rate

Table 1.1 provides a fiscal year summary of the U.S. economic indicators. For calendar year tables, see the appendix.

Risks to the Forecast

The level of uncertainty in the baseline forecast remains elevated. Downside risks now equal upside risks. In the previous forecast, the risks were predominantly on the downside.

Downside Risks

- Federal government shutdown
- Auto workers strike becomes prolonged
- COVID-19 infections reemerge

- Re-imposition of some social restrictions
- New travel restrictions
- War in Ukraine escalates
- Rising interest rates cause a steep recession
- Inflation remains high
- Rising mortgage rates cause a sharp downturn in affordability and housing activity
- Oil prices don't decline
- Increasing geopolitical tensions negatively affect consumer confidence
- Deficit fears limit fiscal policy
- A breakdown in trade relations
- Global growth weakens, pulling exports down
- Increased uncertainty in financial system due to banking collapse

Upside Risks

- Federal Reserve increases rates to slow inflation without causing a recession
- War in Ukraine ends
- Energy prices decline faster than expected
- Increased business confidence leads to more hiring
- Increased consumer confidence gives a boost to consumer spending
- Housing sector improves faster than anticipated
- China successfully transitions to a more consumptionbased economy
- European and emerging market economies grow faster than expected
- Wage growth picks up faster than expected

Fiscal Years

Chapter 2: Washington Economy – Current Conditions and Forecast

- The Washington economy continued to expand through the middle of 2023.
- Washington employment growth in June, July and August was more than expected in the June forecast.
- The Washington unemployment rate has remained at 3.6% since July.
- Washington housing construction slowed in the second quarter of 2023.
- Seattle home prices increased in July for a fourth consecutive month.
- Washington exports decreased 9.1% from the second quarter of 2022 to the second quarter of 2023.
- Seattle consumer price inflation outpaced the national average in the year ending in August 2023.

Current Conditions

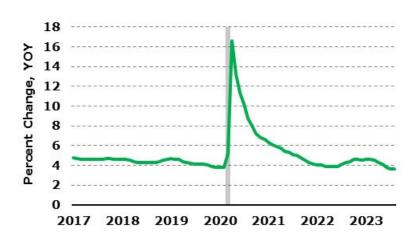

The Washington economy continued to expand through the first The Washington two guarters of 2023. Washington employment growth in June, economv July and August was more than expected in the June forecast. continued to In August, the Washington unemployment rate remained low at expand through 3.6%, unchanged since July. Washington housing construction the middle of slowed in the second guarter of 2023. Seattle home prices 2023 increased in July for a fourth consecutive month. Washington exports decreased 9.1% from the second guarter of 2022 to the second guarter of 2023. Seattle consumer price inflation outpaced the national average in the year ending in August 2023. We have three months of new Washington employment data Washington since the June forecast was released. Total seasonally adjusted

Washington nonfarm payroll employment increased 16,500 in June through August private sector was in administrative and support services with a loss of 3,300 jobs. Government employment dropped by 1,200, although the decline was due to a 6,700 reduction in state government education, which is notorious for seasonal adjustment issues in the summer months.

Revisions added to the level of emplovment Revisions to employment data added 4,800 (0.1%) to the estimated level of total employment in May 2023. The combined effect of the upward revision to historical data and the stronger growth in the last three months is that August employment is 13,200 (0.4%) higher than expected in the June forecast.

Washington's unemployment remains low Washington's unemployment rate remains low. The unemployment rate remained steady at 3.6% in August, unchanged since July (see Figure 2.1). The jobless rate is at a historic all-time low with data going back to 1958.

Figure 2.1 Washington Unemployment Rate

Source: Employment Security Department, data through August 2023

Washington initial claims for unemployment insurance increased over the month of September. The seasonally adjusted number of initial claims had increased to 5,677 in the week ending September 24, 2023, an increase of 147 from the start of the month. The four-week moving average increased to 5,738. The four-week moving average is still down 97% from the April 2020 peak.

Washington housing construction slowed in the second quarter of 2023

Washinaton

initial claims

increased

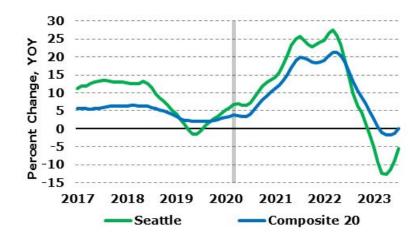

slightly

Washington housing construction slowed in the second quarter of 2023. The number of housing units authorized by building permits declined to 39,500 (SAAR) in the second quarter from 41,900 in the first quarter. The slowdown was due to a 7,000 unit drop in multi-family permits from 27,700 (SAAR) to 20,700. Single family permits increased 4,600 from 14,200 (SAAR) to 18,800 in the second quarter. Permits continued to decline in the first two months of the third quarter. A total of 36,300 units were

permitted in July and August (SAAR) consisting of 18,600 singlefamily units and 17,700 multi-family units. The September forecast expected 38,300 units (SAAR) in the third quarter, consisting of 19,900 single-family units and 18,400 multi-family units.

Seattle-area home prices have stopped declining. Home prices increased 1.7% in July, the fourth straight increase. Prior to this, Seattle home prices had declined for eleven consecutive months. In comparison, the composite-20 index has increased in each of the past five months following eight months of decline. Seattle home prices in July remain down 5.5% over the year while the composite-20 index was up 0.1% over the year.

Source: S&P/Case-Shiller Home Price Indices; data through July 2023

Washington exports decreased 9.1% from the second quarter of 2022 to the second quarter of 2023

Seattle-area

home prices

declining

have stopped

According to the World Institute for Strategic Economic Research (WISER), Washington exports decreased 9.1% from the second quarter of 2022 to the second quarter of 2023 following a 2.6% year-over-year increase in the first quarter. Washington exports of transportation equipment (mostly Boeing planes) increased 4.8% over the year. Agricultural exports declined 41.1% over the year but this could be misleading as the data include soybean and corn exports which receive only minimal processing in Washington. Exports from all other sectors (mostly manufacturing) decreased 1.9% over the year.

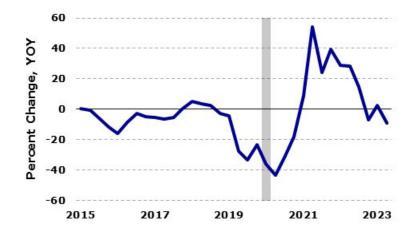

Figure 2.3: Washington Exports

Source: Wiser Trade; data through 2023 Q2

Washington car and truck sales have declined in each of the past three months. The seasonally adjusted number of new vehicle registrations fell 7.4% in September to 267,100 (SAAR). The number of registrations remained up 19.3% over the year in September.

In July, after the June forecast was complete, the U.S. Department of Commerce, Bureau of Economic Analysis (BEA) released the preliminary state personal income estimates for the first quarter of 2023. Washington personal income increased from \$599.0 billion (SAAR) in the fourth quarter of 2022 to \$609.1 billion in the first quarter of 2023. The 6.9% increase (SAAR) in Washington personal income was the 18th highest among the states and District of Columbia and higher than the 5.1% rate increase for the U.S. as a whole. At 4.6% (SAAR), growth in Washington net earnings matched the 4.6% national average growth rate. Property income (dividends, interest, and rent) grew 7.4% in Washington compared to the 6.0% national average. However, transfer receipts grew at a 16.7% annual rate in Washington compared to an only 6.1% increase for the nation.

New BEA estimates have been incorporated We have incorporated the new BEA estimates as well as an additional Washington Quarterly Census of Employment and Wages (QCEW) data. Our current estimate of Washington personal income in the first quarter of 2023 is \$9.2 billion (SAAR) or 1.9% higher than in the June forecast.

Seattle consumer price inflation outpaced the national average in the year ending in August 2023 Seattle metropolitan area consumer price inflation continued to exceed the national average in the year ending in August 2023. From August 2022 to August 2023, the seasonally adjusted Seattle CPI rose 5.4% compared to the 3.7% increase in the U.S. City Average index. Core prices, which exclude food and energy, increased 5.7% in Seattle and 4.3% in the national index.

car and truck sales are down in the last three months Washington personal income outpaced the national average in the first quarter of 2023

Washington

Seattle shelter cost inflation exceeded the national average at 8.0% compared to 7.3%. Seattle inflation excluding shelter also exceeded the national average at 3.9% compared to 1.9%.

Washington State Forecast

The Washington forecast features a higher level of nominal personal income. The Washington forecast features a higher level of nominal personal income throughout the forecast period compared to the June forecast and little change in the employment forecast. We expect a 6.5% increase in nominal Washington personal income this year, up from 4.8% in the June forecast. This has the effect of raising the level of the personal income forecast through 2027, although annual growth rates for 2024 – 2027 average 5.2%, the same as in June. We expect a 2.3% increase in Washington employment this year, up from the 2.1% growth rate expected in the June forecast. We expect employment growth to average 0.7% per year in 2024 through 2027, unchanged from the June forecast. We expect housing permits to total 40,400 units this year, unchanged from the June forecast, and we expect permits to average 44,300 units in 2024 through 2027, up from 44,100 units in the June forecast. We expect the Seattle headline inflation to be 5.8% this year, unchanged from the June forecast. We expect Seattle headline inflation to average 2.1% per year in 2024 through 2027, unchanged from the June forecast.

Washington Payroll Employment

Job growth is similar to June Compared to the June forecast, job growth is little changed (see Figure 2.3). We expect a 2.3% increase in Washington employment this year, up from the 2.1% growth rate expected in the June forecast. We expect slower growth during the remainder of the forecast as the U.S economy slows. We expect employment growth to average 0.7% per year in 2024 through 2027, unchanged from the June forecast. On an annual basis, we expect growth of 0.3% in 2024, 0.6% in 2025, 1.0% in 2026, and 1.0% in 2027.

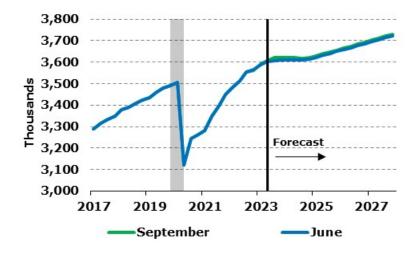

Figure 2.4: Nonfarm Payroll Employment

Source: Employment Security Department, ERFC; historical data through 2023 Q2

After the grounding of the 737 Max and then the pandemic, Washington's aerospace employment declined from 89,600 at end of 2019 to a low of 66,700 in August 2021, a loss of 22,800 jobs. Since August 2021, the industry added back 11,500 jobs, bringing the level to 78,300 in August 2023. We expect aerospace employment to continue to expand in Washington, adding nearly 8,300 jobs from the second guarter of 2023 through the fourth guarter of 2027. On an annual average basis, we expect aerospace employment to grow 8.6% this year and 5.7% in 2024, then slowing 1.8% in 2025, 0.7% in 2026, and 0.6% in 2027.

The software sector in Washington continued to grow throughout We expect 2022 but has lost jobs so far this year. As of January 2023, software job Washington software employment was 19.3% higher than at the business cycle peak of February 2020 but has lost 1,800 jobs this year through August. We assume a total reduction of 2,000 in the third and fourth quarters of 2023 and an additional reduction of 600 jobs in the first guarter of 2024, with growth resuming in the second guarter of 2024. We expect negative growth in 2024 and moderate growth during the remainder of the forecast with growth rates of -2.2% in 2024, 1.1% in 2025, 1.4% in 2026, and 1.2% in 2027.

Construction employment is expected to decline because of a decline in home building in 2023

Aerospace

increasing

losses in

2023

employment is

Construction has recovered more than all the jobs lost in the recession because of a surge in home building. After an initial drop in employment in April of 2020, construction employment came roaring back. As of August 2023, construction employment was 8.4% higher than at its prior peak in February 2020. We believe construction employment will peak in the third quarter of 2023. We expect a decline of 5,500 construction jobs from the

third quarter of 2023 to the third quarter of 2024. On an annual average basis, we expect construction employment to grow by 3.2% in 2023 but decline by 1.0% in 2024 before increasing by 0.1% in 2025, 2.1% in 2026 and 2.3% in 2027.

Washington Personal Income

Washington personal income in the first quarter was higher than in the June forecast In June, after the forecast was complete, the U.S. Department of Commerce, Bureau of Economic Analysis (BEA) released state personal income estimates for the first quarter of 2023. Washington personal income increased from \$599.0 billion (SAAR) in the fourth quarter of 2021 to \$609.1 billion in the first quarter of 2023. The 6.9% increase (SAAR) in Washington personal income was the 18th highest among the states and District of Columbia and led the 5.1% rate of increase for the U.S. as a whole. We have incorporated the new BEA estimates as well as an additional Washington Quarterly Census of Employment and Wages (QCEW) data. Our current estimate of Washington personal income in the first quarter of 2023 is \$9.2 billion (SAAR) or 1.9% higher than in the June forecast.

Our forecast for nominal personal income growth this year is 6.5% As a result, the level of personal income is higher than in the June forecast (see Figure 2.4). Our forecast for nominal personal income growth this year is 6.5%, up from the 4.8% rate in the June forecast. Our new forecast for nominal personal income growth in 2024 through 2027 averages 5.1% per year, up slightly from the 5.0% rate in the June forecast.

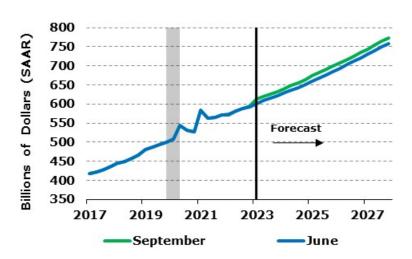

Figure 2.5: Washington Personal Income

Washington Building Permits

The Washington housing construction forecast is slightly higher than in June. The number of authorized housing units reached

Source: Bureau of Economic Analysis, ERFC; historical data through 2023 Q1

The Washington housing construction forecast is slightly higher than in June 56,900 in 2021 which was the highest annual total since 1978. Permits declined throughout 2022 and averaged 49,300 for the year. We believe permits will recover in the fourth quarter of 2023 and in 2024. We expect housing permits to total 40,400 units this year, up from 38,000 units in the March forecast, and we expect permits to average 44,100 units in 2024 through 2027, unchanged from the June forecast. On a calendar year basis, we expect 42,400 units in 2024, 44,200 in 2025, 45,200 units in 2026, and 45,300 units in 2027.

Consumer Price Index

The near-term inflation outlook has increased slightly since the June forecast The near-term inflation outlook has increased slightly since the June forecast, but we expect price pressures to diminish over the remainder of 2023 and in 2024. The Seattle CPI index rose 7.9% in 2022 which was the highest rate in the history of the series which begins with 1983 inflation. On an annual average basis, inflation will slow to 5.8% this year, unchanged from the June forecast. We expect Seattle inflation to average 3.1% in 2024, up from 2.8% in the June forecast. For 2025 through 2027, Seattle inflation will average 2.1%, essentially unchanged from the June forecast

Table 2.1 provides a fiscal year summary of the state economic indicators. For calendar year tables, see the appendix.

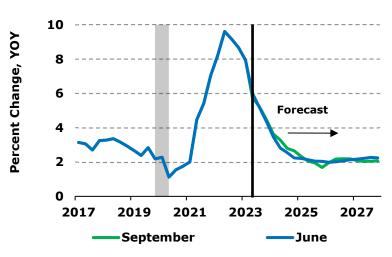

Figure 2.6 Seattle CPI

Source: Bureau of Labor Statistics, ERFC; historical data through 2023 Q2

Alternative Scenarios

Alternative forecasts are required by law In accordance with state law, the Washington State Economic and Revenue Forecast Council adopted a forecast based on optimistic assumptions and a forecast based on pessimistic assumptions in addition to the baseline forecast. In the optimistic scenario, stronger consumer spending, stronger productivity and a faster resolution of the Russia- Ukraine conflict drive faster growth

The optimistic scenario also assumes a stronger Washington economy

Optimistic

The optimistic scenario assumes stronger growth of consumer spending and stronger productivity relative to the baseline. We assume the consumer and business response to the Infrastructure Investment and Jobs Act is more robust than in the baseline, while a quicker resolution to the Russia-Ukraine conflict allows for a lower path of energy prices. We assume firms are able to implement the kinds of large productivity gains they achieved early in the pandemic, which improves corporate profitability. GDP growth is stronger than the baseline. The unemployment rate averages 3.5% in 2023 and 3.7% in 2024 compared to 3.6% and 4.2% in the baseline forecast.

In addition to reflecting the impact of the stronger U.S. forecast on the state economy, the optimistic scenario assumes that aerospace employment grows much faster than assumed in the baseline. After declining this year and in the first quarter of 2024, software employment also grows more rapidly than in the baseline forecast. In the optimistic scenario, the stronger regional economy drives Seattle consumer price inflation above the baseline. Washington average wage growth is also higher in the optimistic scenario than in the baseline. After declining in the fourth quarter of 2023, construction employment grows more rapidly in 2024-27 than in the baseline forecast. Washington nonfarm payroll employment in 2027 is higher by 63,800 jobs (1.7%) than in the baseline forecast and Washington personal income is \$36.8 billion (4.8%) higher.

Pessimistic

Growth slows as consumer spending weakens and the financial sector reduces credit availability

The pessimistic scenario also assumes a weaker local economy The pessimistic scenario assumes weaker consumer spending and a pause in growth, barely avoiding a recession. Turmoil in the banking sector leads to tighter lending standards and a reduction in credit availability. The Russia-Ukraine conflict intensifies and drags on, leading to higher price paths for energy commodities, other industrial commodities and grains. Future GDP growth is less than the baseline forecast but remains positive. The unemployment rate averages 4.0% in 2023 and 5.9% in 2024 compared to 3.6% and 4.2% in the baseline forecast.

In addition to reflecting the impact of the weaker U.S. forecast on the state economy, aerospace employment begins to decline again in the third quarter of 2024. Software employment declines more than in the baseline forecast in the third and fourth quarters of this year and continues to decline through 2027. Construction employment also declines faster than in the baseline this year and the reductions continue through 2027. The relatively weak local economy also puts downward pressure on Washington wages and the Seattle CPI. Washington nonfarm payroll employment in 2027 is 174,400 (4.7%) lower than in the baseline forecast and Washington personal income is \$47.5 billion (6.3%) lower. Table 2.2 compares the optimistic and pessimistic forecasts with the baseline forecast.

Governor's Council of Economic Advisors (GCEA)

In the GCEA scenario, the U.S. and state forecasts were adjusted to match the average view of the Council members.

The Governor's Council of Economic Advisors' (GCEA) national forecast has slightly lower real growth and inflation in 2023 than our baseline forecast. The GCEA real GDP growth forecast averages 1.9% per year in 2023 through 2027, slightly higher than our 1.8% average rate. Their forecast of 1.8% average real consumer spending growth is slightly lower than our 1.9% average growth rate. The GCEA members' personal consumption expenditures (PCE) inflation forecast averages 2.6% per year which is slightly higher than the 2.5% average rate in our forecast. The Council members' mortgage rate forecast averages 5.7% over the five-year forecast horizon, which is the same as our average mortgage rate forecast of 5.7%. The GCEA oil price forecast averages \$81 per barrel which is higher than our \$76 average oil price.

The Governor's Council of Economic Advisors' Washington forecast is similar to our baseline forecast. The GCEA scenario for Washington real personal income growth averages 2.8% per year in 2023 through 2027, the same as in our forecast. The Council members' forecast for total employment growth over the five-year period averages 1.3% per year compared to our 1.0% average growth rate. The Council members' forecast for manufacturing employment growth over the five-year period averages 0.7% per year compared to our 0.4% average growth rate. The Council members' forecast for construction employment growth over the five-year period averages 1.3% per year compared to our 1.4% average growth rate. The GCEA housing permit forecast averages 44,000 units per year compared to our forecast of 43,500 units per year.

Table 2.3 compares the Governor's Council of Economic Advisors' forecast with the baseline forecast.

The Governor's Council of Economic Advisors' (GCEA) national forecast has slightly lower real growth and inflation for 2023

The Governor's Council of Economic Advisors' Washington forecast is similar to our baseline forecast

Chapter 3: Washington State Revenue Forecast Summary

- Tracked revenue collections since June have come in above their forecasted amounts, with most of the surplus in Revenue Act taxes (the main category of GF-S taxes including retail sales and use, business and occupation, public utility and non-cigarette tobacco products).
- New data on taxable activity in the second quarter of 2023 indicate that underlying taxable activity for Revenue Act taxes was higher than expected in June. This has led to increases in forecasted Revenue Act taxes.
- Forecasted real estate excise taxes have also increased slightly due to higherthan-forecasted taxable activity.
- About half of the increase in tallied revenue for the 2021-23 biennium came from large payments of estate taxes that went to the Education Legacy Trust Account.
- The total forecast for funds subject to the budget outlook process was increased by \$265 million in the 2021-23 biennium, \$663 million in the 2023-25 biennium and \$437 million in the 2025-27 biennium.

Overview

Revenue act and real estate excise tax collections were stronger than expected in June, leading to increases in forecasted revenue	Tracked revenue collections since June have come in above their forecasted amounts, with most of the surplus in Revenue Act taxes (the main category of GF-S taxes including retail sales and use, business and occupation, public utility and non-cigarette tobacco products). New data on taxable activity in the second quarter of 2023 indicate that underlying taxable activity for Revenue Act taxes was higher than previously expected, leading to an increase in forecasted taxes. Real estate excise taxes also came in higher than forecasted, resulting in slight forecast increases. The initial tally of revenue for the recently ended 2021-23 biennium is substantially higher than forecasted due to both Revenue Act taxes and unusually large payments of estate taxes into the Education Legacy Trust Account.
Total forecast	Table 3.1 summarizes the changes to forecasted revenue in
change by	funds subject to the budget outlook process for the 2021-23
biennium	through the 2025-27 biennia. Forecasted revenue for funds
(millions):	subject to the budget outlook process was increased by \$265.0
21-23: +\$265	million for the 2021-23 biennium, \$663.4 million in the 2023-25
23-25: +\$663	biennium and \$437.4 million in the 2025-27 biennium. The
25-27: +\$437	September 2023 forecast for these funds total \$64,751.7 million

in the 2021-23 biennium, \$66,691.9 million in the 2023-25 biennium and \$70,926.8 million in the 2025-27 biennium.

(*cash basis, millions of dollars)

The budget outlook process ensures the current biennial budget will be sustainable in the next biennium

Though the ratio of total collections to income has increased from the FY 2015 trough, it is expected to peak in FY 2023

The budget outlook process ensures that the budget adopted for the current biennium will also be sustainable in the next biennium given forecasted revenue. The funds that are currently included when establishing the outlook are the General Fund-State, the Education Legacy Trust Account, the Washington Opportunity Pathways Account and the Workforce Education Investment Account. Once funded, the planned Fair Start for Kids Account will also be subject to the outlook. The recent history and forecast of these funds can be found in Table 3.17.

Figure 3.1 shows the ratio of revenue collected for funds subject to the budget outlook relative to state personal income. Through FY 2005, the revenue represented in the chart is what is currently defined as General Fund-State (GF-S) revenue. From FY 2006 onward the revenue includes the Education Legacy Trust Account (ELTA), which in its early years was wholly funded by the estate tax and a portion of the cigarette tax. From FY 2011 onward, the total includes the Washington Opportunity Pathways account (OPA), which is funded by Lottery receipts. From FY 2020 onward the total includes the Workforce Education Investment Account (WEIA), funded by a surtax on large service providers and companies that involve advanced computing. As can be seen in the chart, the ratio of revenue to income followed a downward trend from FY 1995 to FY 2015, broken only by the housing boom that raised the ratio from 2005 to mid-2008, and by temporary taxes and transfers of funds from non-GF-S sources into the GF-S that again boosted the ratio in FY 2011. While the ratio grew slightly in FY 2016 and FY 2017, it increased rapidly in FY 2018 and FY 2019 when the state property tax levy increased to partially displace local levies and increased further in FY 2020 with the establishment of the graduated real estate excise tax. The pandemic-related booms in real estate and spending on goods, coupled with the new WEIA surtax, increased the ratio further in FY 2021 and FY 2022, and the new tax on certain capital gains increased the ratio further in FY 2023. From FY 2024 onward, however, total revenues are expected to grow at a rate lower than the rate of income growth, causing the ratio to continue its pre-FY 2015 downward trend through FY 2027.

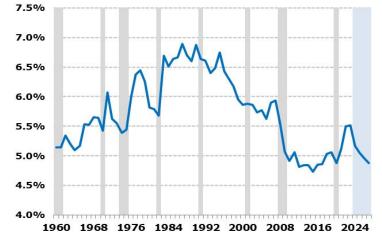

Figure 3.1: Funds subject to the budget outlook as a Percentage of State Personal Income (Fiscal Years)

Source: ERFC, data/estimates through fiscal year 2023. Gray shaded area indicates recession; blue shaded area indicates forecast.

Track Record for the 2021-23 Biennium

The current forecast is \$7.74 billion higher than the forecasted revenue at the time of the initial 2021-23 budget

Total revenue

relative to state

personal income has

generally been

increasing since 2015

decline after FY 2023

but is expected to

Table 3.10 summarizes the historical changes to the forecast of funds subject to the budget outlook for the 2021-23 biennium. The February 2018 forecast was the initial forecast for the biennium. The September 2023 forecast is \$11.96 billion (22.7%) higher than the initial forecast. Non-economic changes have increased the forecast by \$2.02 billion (3.8%). Excluding non-economic changes, the current forecast is \$9.94 billion (18.8%) higher than the initial forecast. The March 2021 forecast, coupled with a \$399 million revenue increase from legislative and budget-driven revenue changes passed in the 2021 legislative session after the March forecast, was the basis for the initial budget for the 2021-23 biennium. The September forecast of biennial revenue is \$7.74 billion (13.7%) higher than that sum.

Track Record for the 2023-25 Biennium

The current forecast is \$951 million higher than the forecasted revenue at the time of the initial 2023-25 budget Table 3.11 summarizes the historical changes to the forecast of funds subject to the budget outlook for the 2023-25 biennium. The February 2020 forecast was the initial forecast for the biennium. The September forecast of GF-S revenue is \$6.85 billion (11.4%) higher than the initial forecast. Non-economic changes have increased the forecast by \$0.63 billion (1.0%). Excluding non-economic changes, the current forecast is \$6.22 billion (10.4%) higher than the initial forecast. The March 2023 forecast, coupled with a \$287 million revenue increase from legislative and budget-driven revenue changes passed in the 2023 legislative session after the March forecast, was the basis for the initial budget for the 2023-25 biennium. The September forecast of biennial revenue is \$951 million (1.4%) higher than that sum.

Recent Collection Experience

Tracked collections were \$177 million (2.7%) higher than forecasted in June GF-S revenue collections from the Department of Revenue (DOR) and the Washington court system are tracked monthly. In the period since the June forecast, total revenue from the above sources came in \$177.2 million (2.7%) higher than expected (see Table 3.2). Revenue Act collections reported by the DOR were \$167.0 million (2.9%) higher than forecasted and revenue from other DOR tax sources was \$10.3 million (1.1%) higher than forecasted.

Table 3.2: Pre-Forecast Collection Variance of MajorGeneral Fund-State Taxes by Agency (relative to the Juneforecast, cash basis, millions of dollars)

<u>Agency/Source</u> Department of Revenue	Collection <u>Variance</u>	Percent of <u>Estimate</u>
Revenue Act	\$167.0	2.9%
Non-Revenue Act	\$10.3	1.1%
Subtotal	\$177.2	2.7%
Washington court system	\$0.0	0.1%
Total*	\$177.2	2.7%

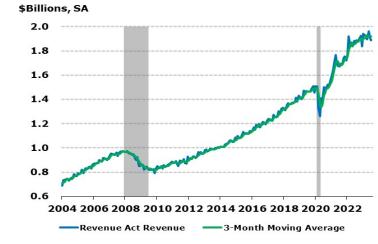

* Detail may not add to total due to rounding. Source: ERFC; Period: June 11 - September 10, 2022

Real estate excise tax (REET) came in \$19.1 million (7.3%) higher than forecasted. Property tax collections came in \$2.0 million (0.5%) lower than forecasted. Cigarette tax collections came in \$4.4 million (5.7%) lower than forecasted and liquor sales and liter tax receipts came in \$1.4 million (1.5%) lower than forecasted. Net refunds of unclaimed property out of the GF-S were \$3.0 million higher than forecasted. Revenue from all other DOR revenue sources came in \$2.1 million (4.5%) lower than forecasted. Revenue from the Washington court system was \$12,000 (0.1%) higher than forecasted.

Figure 3.2 shows seasonally adjusted Revenue Act receipts excluding payments received under the tax amnesty program in early 2011 and other large payments. It is also adjusted for past changes in payment patterns and deferred payments in the first half of 2020. As shown in the figure, collections dropped precipitously during the early months of the pandemic, with a peak decline of 14.8% year over year in the May 11-June 10, 2020 collection period (April 2020 activity). Collections then recovered, and exceptional growth began in the spring of 2021. Adjusted collections for first quarter 2023 activity (February 11 -May 10, 2023 collections) were up 5.0% year over year. Adjusted collections for second guarter 2023 activity (May 11 -August 10, 2023 collections) were up 3.4% year over year. Adjusted collections for June 2023 activity were up 4.2% year over year and collections for July 2023 activity were up 0.4% year over year.

Non-Revenue Act tax collections were higher than forecasted mainly due to REET

Adjusted Revenue Act collections were up 3.4% year over year for second quarter activity after 5.0% year over year growth for first quarter activity

Source: ERFC; Data through September 10, 2023

*Adjusted for large payments/refunds, payment pattern changes and deferred payments

Real estate activity was slightly higher than expected in June

Year-overyear

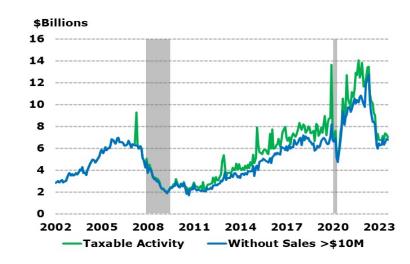

collections growth was

0.4% in the

most recent period

> Taxable real estate activity was slightly above the June forecast. Sales of property valued below \$10 million declined sharply in November and December but have increased somewhat in recent months (see Figure 3.3). Both the number of transactions and the price per transaction have declined since last year. Large commercial sales (sales greater than \$10 million) are down from their high levels of last year but remain moderately strong, averaging \$450 million per month over the last three months.

Source: ERFC estimates through August 2023

Residential sales activity has declined sharply since May 2022

General Fund-State Revenue Forecast by Source

The GF-S is the largest of the funds subject to the budget outlook The General Fund-State (GF-S) is the largest of the funds subject to the budget outlook, consisting of most of the commonly paid state taxes. The history and forecast of nominal and real GF-S revenue by biennium can be found in Table 3.3. GF-S forecast changes by agency and major revenue classification for the 2021-23 biennium can be found in Table 3.5 (cash) and Table 3.6 (GAAP). Forecast changes for the 2023-25 biennium can be found in Table 3.7 (cash) and Table 3.8 (GAAP). The GF-S forecast by fiscal year and major source category through FY 2025 can be found in Table 3.9.

Department of Revenue

TaxesThe Department of Revenue (DOR) collects and administers mostcollected byof Washington's GF-S revenue, accounting for 95.3% ofDOR makeestimated total GF-S revenue in FY 2023. The largest taxup most ofsources administered by the DOR are the retail sales tax,GF-Sbusiness and occupation tax, property tax, use tax, cigarette taxrevenueand real estate excise tax. The revenue forecasts discussedbelow can be found in Tables 3.5-3.8.

Retail sales taxes are the largest source of GF-S revenue

The retail sales tax is the largest source of GF-S revenue, accounting for 47.8% of GF-S revenue in FY 2023. The state's share of the tax is 6.5% of the sales price. While construction labor, repair services, and some other services are taxed, the tax does not apply to most services. As can be seen in Figure 3.4, taxable sales as a share of personal income has long been on a declining trend. The share fell even more sharply than the previous trend from the 2008 recession through FY 2012. In that year, 34.0% of personal income was spent on taxable items and services, the lowest percentage on record. Increased spending on construction and autos, along with legislative changes to services and companies deemed taxable, caused the share to grow through FY 2017, reaching 36.1% of personal income. Legislation passed in 2017, 2018 and March 2019 that extended the tax to bottled water and online sales caused a continued increase in the ratio. The COVID-19-related collapse in late FY 2020, coupled with federal emergency income support, caused the ratio of sales to income to dip in FY 2020. In the last months of FY 2020 and continuing into FY 2021, however, the trend of increasing purchases of nontaxable services reversed due to pandemic-related shutdowns of services and stimulus payments to households. With the limited availability of services, consumers opted to buy goods. Car sales and construction activity also increased. These trends continued into FY 2022, which, coupled with a slowdown in FY 2022 income growth after the stimulus-boosted income levels of FY 2021, caused the ratio of sales to income to spike to 38.2%. While taxable sales growth slowed in FY 2023, they are still forecasted to grow slightly faster than personal income, causing the expected ratio to increase to 38.3%. After FY 2023, however, the ratio is forecasted to continue its historical downward trend

through FY 2027 as income once again grows faster than taxable sales. Forecasted and historical taxable retail sales by fiscal year can be found in Table 3.4.

Figure 3.4: Taxable Sales* as Percentage of State Personal Income

The ratio of taxable sales to state personal income has been on a declining trend historically

*Past tax base adjusted to represent current base. Gray shaded area Indicates recession, blue shaded area indicates forecast. Source: ERFC; Data through FY22, prelim. estimate/forecast through FY27

Taxable activity growth slowed to 1.0% in FY 2020 due to

Growth in FY 2019 taxable activity was relatively strong at 7.6%.

Retail sales tax receipt growth forecast:

FY24: 1.8% FY25: 2.8% FY26: 3.5% FY27: 3.6% pandemic-related shutdowns in the latter part of the year, but then rebounded by 11.1% in FY 2021 and 11.2% in FY 2022, supported by rising inflation. In the preliminary estimate, growth slowed to 5.7% in FY 2023. Taxable activity growth is expected to slow further to 1.6% in FY 2024. Growth is then forecasted to increase to 2.9% in FY 2025, 3.6% in FY 2026 and 3.7% in FY 2027 (see Table 3.4). Due to the lag between taxable activity and collections and the presence of tax deferrals, credits, refunds, and payments of past due taxes, the growth in actual collections differs from the growth in taxable activity. Growth in collections for FY 2020 was 1.7% and growth in FY 2021 was 10.3%. Collections increased by 12.4% in FY 2022, boosted by several large payments of past-due taxes and one large early payment of deferred taxes, and increased by 5.7% in FY 2023. Collections growth is forecasted at 1.8% in FY 2024, 2.8% in FY 2025, 3.5% in FY 2026 and 3.6% in FY 2027.

Business and Occupation taxes are the second largest source of GF-S revenue

The business and occupation (B&O) tax is the second largest source of GF-S revenue, accounting for 20.1% of GF-S revenue in FY 2023. It is a tax on the gross receipts of all businesses operating in Washington. The state portion of the tax applies ten different rates according to various classifications of business activities. In FY 2021, the largest contributor to total state B&O tax was the services sector, which had a gross tax rate of 1.5% and represented an estimated 45% of B&O taxes due. The next largest sector was retailing, which is taxed at 0.471% and represented an estimated 24% of taxes due, followed by the wholesaling sector, which is taxed at 0.484% and represented an estimated 19% of taxes due.

B&O tax growth forecast: FY24: 1.0% FY25: 2.8% FY26: 4.3% FY27: 4.4%	In FY 2019, B&O tax receipts grew by 6.9%. Despite a second quarter collapse in activity, FY 2020 growth remained positive at 3.6% followed by growth of 7.9% in FY 2021. Collections grew 14.5% in FY 2022 due to both strong activity and the receipt of several large one-time payments of past-due taxes. Strong activity continued in FY 2023, bringing collections growth of 9.8%. The forecasted slowdown in state economic growth decreased expected growth to 1.0% in FY 2024 and 2.8% in FY 2025. Growth is then forecasted to accelerate to 4.3% in FY 2026 and 4.4% in FY 2027.
<i>State property taxes are the third largest source of GF-S revenue</i>	The state property tax levy is the third largest source of GF-S revenue, accounting for 14.5% of total revenue in FY 2023. Although the tax goes into the GF-S, it is dedicated to the funding of basic education. As discussed in the <u>September 2017</u> forecast publication, the total amount of the state levy was increased by new legislation in June 2017, with the increases beginning in FY 2018.
Property tax growth forecast: FY24: 2.7% FY25: 2.4% FY26: 2.4% FY27: 2.3%	Constrained by prior law to a levy growth rate of one percent on existing property (or the rate of inflation if less than one percent), property tax collections grew by 1.9% in FY 2017. The first payments of the additional state levy began to arrive in the latter half of FY 2018, bringing total GF-S property tax growth of 31.4% for the fiscal year. Collections fell by 12.4% in FY 2019 due to a temporary reduction in the levy rate for calendar year 2019 and a \$936 million transfer of collections from the levy to the Education Legacy Trust Account (ELTA). Collections rebounded by 44.2% in FY 2020 due to a smaller \$83.8 million transfer to ELTA and the end of the temporary levy reduction in the second half of the year. FY 2021 collections grew by 27.3% due to a full year of collections at the unreduced levy rate along with the collection of some taxes that would have been collected in FY 2020 but were instead deferred due to the pandemic. Absent the extra payments from deferrals, growth slowed to 0.4% in FY 2022. Growth then increased to 1.5% in FY 2023. Collections growth is forecasted at 2.7% in FY 2024, 2.4% in FY 2025 and FY 2026 and 2.3% in FY 2027. Growth in property tax levies excluding new construction is once again restricted to the lesser of one percent per year or the rate of inflation beginning with the calendar year 2022 levy.
REET rates and distributions changed on January 1, 2020	The real estate excise tax (REET) was the fourth largest DOR source of GF-S revenue in FY 2023, accounting for 3.6% of total revenue. The tax is applied to both residential and commercial real estate, including purchases of vacant land. Prior to January 1, 2020, the state portion of REET was 1.28% of the sales price and was divided between the GF-S (92.3%), a fund for local public works (2.0%), a fund for assistance of cities and counties (1.6%) and ELTA (4.1%). As of January 1, 2020 rates are 1.1% for the portion of the selling price less than or equal to \$500 thousand, 1.28% for the portion greater than \$500 thousand and less than or equal to \$1.5 million, 2.75% for the portion greater than \$1.5 million and less than or equal to \$3.0 million and 3.0% for the portion greater than \$3.0 million. The distributions of the

tax are also changed: 79.4% is deposited in the GF-S, 1.7% in the Public Works Assistance Account, 1.4% in the City-County Assistance Account and the remainder (17.5%) in ELTA. Beginning July 1, 2023, distributions to the Public Works Assistance Account increase to 5.2% and distributions to the Education Legacy Trust Account decrease to 14%. The new rates and distributions were designed to result in increased collections for both the GF-S and ELTA. From FY 2013 through 2019, the recovery in the residential real GF-S REET estate market after the Great Recession has been accompanied growth by a boom in commercial real estate. Sales of large commercial forecast: properties began to weaken in FY 2019 while residential sales FY24: -15.2% increased, resulting in a 0.5% increase in collections in FY 2019. FY25: 13.8% In the first half of FY 2020, residential sales remained strong, FY26: 9.3% and commercial sales surged in December 2019 ahead of the FY27: 11.0% January 1, 2020 change in tax rates. The COVID-induced real estate market downturn that began with April 2020 collections, however, brought a total decline of 0.7% in FY 2020. Sales then began to boom in July 2020, with strength in both the residential and commercial markets, bringing collections growth of 34.4% in FY 2021 and 35.9% in FY 2022. In FY 2023, higher mortgage rates and unaffordable high prices in many areas caused both the number of transactions and prices to decrease, bringing a decline in REET receipts of 43.8%. Receipts are expected to decline a further 13.8% in FY 2024. Growth is then expected to resume at 13.8% in FY 2025, 9.3% in FY 2026 and 11.0% in FY 2027. The state use tax was the fifth largest DOR GF-S revenue source Use tax was in FY 2023 at 3.3% of total receipts. The state portion of the tax the fifth is 6.5% of the purchase price for items used in the state that largest DOR were not subject to the state retail sales tax. Examples of items GF-S source in FY 2022 subject to the state use tax are goods purchased out-of-state; online and mail-order purchases, where sales tax was not collected; or purchases of used vehicles from private individuals. Use tax collections grew 9.0% in FY 2019, boosted by several Use tax growth large one-time purchases. Despite strong collections in the first forecast: half of the fiscal year, FY 2020 collections declined by 4.9%. Collections increased by 16.1% in FY 2021 and 7.4% in FY 2022 FY24: -7.8% FY25: 0.3% due to record high used car sales. While used car sales have FY26: 3.2% moderated, large payments from other sectors increased growth FY27: 4.0% to 12.6% in FY 2023. The absence of FY 2023's large payments is expected to cause use tax collections to decrease by 7.8% in FY 2024. Growth then continues at 0.3% in FY 2025, 3.2% in FY 2026 and 4.0% in FY 2027. Public utility taxes were the sixth largest DOR source of GF-S Public utility revenue in FY 2023, bringing in 1.8% of total receipts. The tax taxes were the applies to the gross income of sales to consumers by public and sixth largest DOR GF-S source in privately owned utilities and is in lieu of the B&O tax. The FY 2022 largest source of public utility taxes is the 3.873% tax on the

distribution and generation of electrical power, followed by the

3.852% tax on the distribution of natural gas.

Growth forecast: FY24: 0.6% FY25: 2.6% FY26: 3.2% FY27: 2.2%	Public utility tax receipts grew by 0.3% in FY 2020. The expiration of a large tax credit plus growth in natural gas and electricity use increased collections by 4.2% in FY 2021. The resumption of business activities plus increases in utility prices boosted growth to 16.3% in FY 2022. Further increases in utility prices brought growth of 12.4% in FY 2023. Growth is now forecasted to slow to 0.6% in FY 2024, 2.6% in FY 2025, 3.2% in FY 2026 and 2.2% in FY 2027.
<i>Taxes on sales of spirits were the seventh largest DOR GF-S source in FY 2022</i>	State taxes on sales of spirits were the seventh largest DOR GF-S revenue source in FY 2023 at 1.1% of total receipts. Spirits sales are taxed by both volume and price. The total tax rate by volume is 3.7708 per liter. Liter tax receipts are deposited wholly into the GF-S. The price-based spirits tax is split between the GF-S (65% of receipts) and the Liquor Excise Tax fund (35% of receipts). The overall tax rate on sales to consumers is 20.5% of the sales price and the overall rate on sales to restaurant licensees is 13.7%.
Sprits tax growth forecast: FY24: 0.6% FY25: -0.7% FY26: 0.3% FY27: 0.6%	Total tax collections on spirits sales grew 5.2% in FY 2019. During the pandemic, spirit sales increased, with total tax collections growing by 8.2% FY 2020 and 9.9% in FY 2021. Collections increased a further 1.8% in FY 2022 and 1.5% in FY 2023. Collections are forecasted to increase by 0.6% in FY 2024 but decrease by 0.7% FY 2025 before returning to growth of 0.3% in FY 2026 and 0.6% in FY 2027.
<i>The cigarette tax was the eighth largest DOR GF-S source in FY 2022</i>	The state tax on cigarettes was the eighth largest DOR GF-S revenue source in FY 2023 at 0.9% of total receipts. Prior to FY 2010, the tax made up a much smaller portion of GF-S revenue because much of the tax was dedicated to non-GF-S accounts. In FY 2010, all of the tax except the portion dedicated to the Education Legacy Trust account was redirected to the GF-S, and in FY 2011 all of the cigarette tax was redirected to the GF-S. The current tax rate, which took effect May 1, 2010, is \$3.025 per pack of 20 cigarettes.
Cigarette tax growth forecast: FY24: 0.2% FY25: -3.2% FY26: -3.8% FY27: -3.5%	The total number of taxed cigarettes has been on a downward trend due to a continuing decline in the number of smokers. Recently, the rate of decline has increased. Collections decreased by 3.3% in FY 2019 after decreasing by 5.4% in FY 2018. The decrease in collections accelerated to 6.0% in FY 2020, partially due to a state increase in the legal age to purchase cigarettes from 18 to 21 that took effect on January 1, 2020. Collections declined 2.4% in FY 2023. Because the large decline in FY 2023 collections was partially due to refunds and the timing of payments for tax stamps around the start and end of the fiscal year, collections are expected to increase by 0.2% in FY 2024 from FY 2023's depressed level. Collections are then expected to continue to decline by 3.2% in FY 2025, 3.8% in FY 2026 and 3.5% in FY 2027.

Forecasted Revenue from Cannabis-Related Sales

Sales of cannabis products in state-licensed stores began in July 2014 Initiative 502, approved by voters in the November 2012 election, legalized the sale and use of recreational cannabis and cannabis products in Washington. The first legal sales of cannabis products in state-licensed stores occurred in July 2014. During the 2015 regular and special sessions, legislation was passed that substantially altered the market rules set up by the initiative. 2SSB 5052, passed during the regular session, brought previously unregulated medical marijuana dispensaries into the same regulatory regime as licensed recreational cannabis outlets. This legislation was outlined in our June 2015 forecast publication. After the June 2015 forecast, 2E2SHB 2136, passed in the second special session, changed the cannabis excise tax from a 25 percent tax collected from growers, processors and retailers to a 37 percent tax on retail sales only. The law also made changes to the distribution of tax and fee revenue. Cannabis taxes and license fees are collected by the Liquor and Cannabis Board (LCB) and are placed into a dedicated fund with annual appropriations to various other accounts including the GF-S.

Change in GF-S forecast of total cannabisrelated revenue by biennium (millions):

21-23: \$0.0 23-25: -\$2.7 25-27: -\$3.1 Distributions of cannabis excise taxes to the GF-S totaled \$15.3 million in the 2013-15 biennium and \$147.6 million in the 2015-17 biennium. GF-S distributions were \$248.9 million in the 2017-19 biennium and \$361.0 million in the 2019-21 biennium. The initial tally of GF-S distributions for the 2021-23 biennium is \$318.9 million, the same as expected in June. The forecast of transfers for the 2023-25 biennium has been decreased \$2.7 million to \$308.8 million. The forecast of GF-S distributions for the 2025-27 biennium has been decreased \$3.1 million to \$337.1 million. Details of the forecasted distributions from the account can be found in Table 3.18.

The Office of Financial Management (Other Agencies)

The Office of Financial Management (OFM) is responsible for Forecast preparing General Fund-State revenue and transfer forecasts for change by all agencies excluding the Department of Revenue, the Liquor biennium and Cannabis Board, the Insurance Commissioner, the (millions): Washington State Lottery, and the State Treasurer. The initial 21-23: \$4.4 tally of OFM's net GF-S revenue for the 2021-23 biennium is 23-25: \$4.6 \$104.0 million, \$4.4 million higher than forecasted in June. The 25-27: \$2.9 forecast of revenue for the 2023-25 biennium was increased \$4.6 million to \$12.2 million and the forecast for the 2025-27 biennium was increased \$2.9 million to -\$92.8 million. The negative value of projected 2025-27 revenue indicates that more funds will be transferred out of the GF-S by the agencies overseen by the OFM than will be transferred into the GF-S from those agencies during that biennium.

State Treasurer

21-23: -\$0.5 23-25: \$59.9 25-27: -\$30.6	The Office of the State Treasurer generates GF-S revenue by investing state short-term cash reserves. The initial tally of GF-S revenue for the 2021-23 biennium is \$233.8 million, \$0.5 million less than forecasted in June. The forecast of revenue for the
Forecast change by biennium (millions):	2023-25 biennium has been increased \$59.9 million to \$598.7 million, mainly due to higher expected average balances. The forecast of GF-S revenue for the 2025-27 biennium has been decreased \$30.6 million to \$402.3 million due to expected lower effective interest rates.

Insurance Commissioner

Forecast change by
biennium (millions):The Office of the Insurance Commissioner collects premium taxes
on most classes of insurance sold in Washington State. These
taxes are distributed to the GF-S and various accounts in support
of fire services. The initial tally of GF-S revenue for the 2021-23
biennium is \$1,601.1 million, \$13.8 million higher than
forecasted in June. The forecast for the 2023-25 biennium has
been increased \$33.7 million to \$1,729.8 million and the forecast
of GF-S revenue for the 2025-27 biennium has been increased
by \$39.0 million to \$1,817.5 million.

Liquor and Cannabis Board

Forecast change by biennium (millions): 21-23: \$0.3 23-25: \$14.0 25-27: \$28.9	The Liquor and Cannabis Board (LCB) collects fees from distributors and retailers on sales of spirits and surtaxes on sales of beer and wine (sales and liter taxes on sprits are collected by the DOR). The LCB is also responsible for the collection of excise taxes and fees associated with the legalized sale and use of recreational and medicinal cannabis discussed previously. The initial tally of GF-S distributions for the 2021-23 biennium is \$674.6 million, \$0.3 million higher than expected in June. The forecast for the 2023-25 biennium has been increased \$14.0 million to \$639.2 million and the forecast of GF-S distributions for the 2025-27 biennium has been increased \$28.9 million to \$688.8 million.
--	---

Lottery Commission

GF-S forecast change by biennium (millions): 21-23: \$0.0 23-25: \$10.5 25-27: \$0.6	While most of the proceeds from sales of lottery games go to the Washington Opportunity Pathways Account (OPA), distributions are also made to the Problem Gambling and Economic Development accounts. Details of the forecast of the distribution of Lottery earnings can be found in Table 3.15 on a cash basis and Table 3.16 on a GAAP basis. When total profits from all Washington-only games plus the Powerball game exceed \$102 million per year, the amount above \$102 million is transferred to the GF-S. The initial tally of GF-S transfers for the 2021-23 biennium is \$77.8 million, unchanged from the June forecast. The forecast of GE-S transfers for the 2023-25 biennium bas
	The forecast of GF-S transfers for the 2023-25 biennium has been increased \$10.5 million to \$71.3 million and the forecast for

the 2025-27 biennium is has been increased \$0.6 million to \$64.7 million.

Washington Court System

Forecast change by biennium (millions): 21-23: -\$1.0 23-25: \$1.2 25-27: \$5.0 The GF-S receives surcharges on certain filing fees, fines, and infraction penalties collected by the Washington court system. This revenue is transferred to the GF-S on a monthly basis. GF-S transfers for the 2021-23 biennium totaled \$85.2 million, \$1.0 million less than forecasted in June. The forecast of GF-S transfers for the 2023-25 biennium has been increased \$1.2 million to \$78.0 million and the forecast for the 2025-27 biennium has been increased \$5.0 million.

The Relationship between the Cash and GAAP General Fund-State Revenue Forecasts

GAAP forecasts are based on the period in which the revenue is earned rather than received Legislation enacted in 1987 requires that the state's biennial budget be in conformance with Generally Accepted Accounting Principles (GAAP). It also requires a GF-S revenue forecast on both a cash and GAAP basis. The GAAP forecasts of GF-S revenue for the 2017-19 and 2019-21 biennia are presented in Tables 3.6 and 3.8 and the GAAP forecast of Lottery revenue transfers for those biennia is in Table 3.15. The primary difference between the cash and GAAP forecasts is the timing of the receipt of revenue. On a GAAP basis, revenue is credited to the biennium in which it is earned even though it may not have been received. The cash forecast, on the other hand, reflects expected cash receipts during a fiscal period. The forecast on a GAAP, or accrual, basis is primarily used for financial reporting. The cash forecast is used for cash flow management and revenue tracking. The cash forecast is also the forecast used in the state's budgetary balance sheet, which is the principal tool for assessing the General Fund's current surplus or deficit position. References to the GF-S forecast in the text of this chapter refer to the cash forecast unless otherwise noted. Likewise, figures from revenue tables other than Tables 3.6, 3.8 and 3.16 are projected on a cash basis.

Alternative Forecasts for the 2023-25 and 2025-27 Biennia

<i>Optimistic scenario (billions):</i>	Chapter 2 outlines optimistic and pessimistic economic scenarios relative to the baseline economic forecast. The forecast assigns a probability of 50% to the baseline forecast, 25% to the
23-25: +\$3.30 25-27: +\$6.47	optimistic scenario and 25% to the pessimistic scenario. The revenue implications of these alternative scenarios for the 2023-25 biennium are shown in Table 3.13 and those of the 2025-27 biennium are shown in Table 3.14. For the 2023-25 biennium,
<i>Pessimistic scenario (billions):</i>	the optimistic forecast generates \$66.656 billion in GF-S revenue, 3.299 billion (5.2%) more than the baseline scenario, while the pessimistic forecast produces \$59.361 billion in
23-25: -\$4.00 25-27: -\$7.17	revenue, \$3.996 billion (6.3%) less than the baseline. For the 2025-27 biennium, the optimistic forecast generates \$73.854

billion in GF-S revenue, \$6.472 billion (9.6%) more than the baseline scenario, while the pessimistic forecast produces \$60.212 billion in revenue, \$7.170 billion (10.6%) less than the baseline.

Washington Opportunity Pathways Account

change by all pr biennium lotte (millions): forec 21-23: -\$0.3 revel 23-25: \$6.6 millio	Washington Opportunity Pathways Account (OPA) receives rofits (excluding statutory transfers) from Washington-only ry games plus all profits from the Mega Millions game. The cast of OPA revenue for the 2021-23 biennium has been eased \$0.3 million to \$393.3 million. The forecast of OPA nue for the 2023-25 biennium has been increased \$6.6 on to \$361.3 million and the forecast for the 2025-27 nium has been decreased \$0.8 million to \$357.5 million.

Education Legacy Trust Account

The Education Legacy Trust Account (ELTA) was created in the ELTA forecast 2005 legislative session, with revenue collection beginning in FY change by 2006. Funds from the account may only be used for support of biennium (millions): the common schools, expanding access to higher education through funding for new enrollments and financial aid, and other 21-23: \$140.7 educational improvement efforts. The ELTA is primarily funded 23-25: \$12.4 by a tax on estates of over \$2 million. Legislation from the 2013 25-27: \$7.3 special session, however, added revenue from public utility (through FY 2023) and real estate excise taxes (REET), which had previously gone into non-GF-S accounts. Subsequent legislation also added revenue from solid waste taxes from FY 2016 – FY 2023 and a transfer of \$935 million from the additional property tax levy to the account in FY 2019. Forecasted revenue was further increased in the 2021 legislative session by ESSB 5096, which establishes a tax on certain transactions that produce capital gains above \$250,000. The forecast of ELTA revenue has been increased by \$140.7 million for the 2021-23 biennium, mainly due to higher-than-expected estate tax receipts. The forecast has been increased by \$12.4 million for the 2023-25 biennium and \$7.3 million for the 2025-27 biennium due to increased estate tax and REET collections. Forecasted ELTA receipts are now \$2,571.2 million for the 2021-23 biennium, \$2,135.9 million for the 2023-25 biennium and \$2,313.5 million for the 2025-27 biennium.

Workforce Education Investment Account

WEIA forecast change by biennium	The Workforce Education Investment Account (WEIA) was created in the 2019 legislative session. The account, the purpose of which is to help fund the state's higher education
(millions):	system and student loans, was originally funded by a surcharge
21-23: \$13.3 23-25: \$28.3 25-27: \$30.8	on specific industries that benefitted from an educated workforce. This tax was scheduled to take effect on January 1, 2020, and the Economic and Revenue Forecast Council was later tasked with forecasting revenue generated for the account. ESSB 6492, passed in early February of the 2020 legislative

session, retroactively eliminated the existing surcharge and replaced it with a simplified version that is effective April 1, 2020. The simplified surcharge applies to businesses with gross taxable activity under the "services and other activities" category of \$1 million or more (with some nonprofit and other businesses exempt). In addition to this surcharge, which equals 0.25% of gross taxable income, another surcharge is applied to a group of "select advanced computing businesses," and is paid quarterly. The forecast of WEIA revenue has been increased by \$13.3 million in the 2021-23 biennium due to higher-than-expected collections since the June forecast. Because of this higher baseline, the forecast has been increased by \$28.3 million in the 2023-25 biennium and \$30.8 million in the 2025-27 biennium. WEIA revenue is now forecasted at \$779.0 million in the 2021-23 biennium, \$837.6 million in the 2023-25 biennium and \$874.4 million in the 2025-27 biennium. The WEIA forecast by fiscal year is presented in Table 3.19.

Budgetary Balance Sheet for the 2021-23 and 2023-25 Biennia

The forecast implies total reserves of \$7.520 billion at the end of the 2021-23 biennium and \$5.047 billion at the end of the 2023-25 biennium for GF-S, ELTA, OPA and WEIA

Table 3.12 shows the budgetary balance sheet for the 2021-23 and 2023-25 biennia as prepared by the Office of Financial Management and the House and Senate fiscal committees. The balance sheet shows not only projected GF-S spending and resources but also total projected spending and resources for the GF-S plus the other main non-transportation state-funded accounts: the Education Legacy Trust Account (ELTA), the Washington Opportunity Pathways Account (OPA) and the Workforce Education Investment Account (WEIA). As shown in the table, the GF-S beginning fund balance for the 2021-23 biennium was \$3,673.7 million and the total beginning balance for GF-S, ELTA, OPA and WEIA combined was \$4,160.7 million. Based on the current enacted budget, the balance sheet projects total GF-S reserves of \$6,482.0 million at the end for the 2021-23 biennium and total reserves for the GF-S, ELTA, OPA and WEIA accounts of \$7,520.3 million. Based on the newly enacted budget for the 2023-25 biennium, the balance sheet projects total GF-S reserves of \$4,222.6 million at the end of the biennium and total reserves for the GF-S, ELTA, OPA and WEIA accounts of \$5,046.8 million.

*First official forecast for the 2021-23 biennium

**Change in Workforce Education Investment Account forecast represents change from the initial fiscal note estimate of \$627 million first recorded in February 2020 forecast

***Resources for the initial 2021-23 budget include forecasted March 2021 revenue plus legislative revenue changes from 2021 session subsequent to the March forecast

#1 Sum of legislative and budget driven revenue changes from the 2018 legislative session

#2 Estimated increase in sales tax collections due US Supreme Court ruling of June 21, 2018

#3 Effects of SSB 5581, passed in March of 2019 legislative session

#4 Sum of legislative and budget driven revenue changes from the 2018 legislative session subsequent to the March 2019 forecast

#5 Establishment of Workforce Education Investment Account

#6 Legislative and budget-driven revenue changes from the 2020 legislative session

#7 Legislative and budget-driven revenue changes from the 2021 legislative session

#8 Addition of financial services tax to forecast after court approval and expected refunds from DOR rule change on apportionment

#9 Legislative and budget-driven revenue changes from the 2022 legislative session

#10 July 2022 BTA decision that allows machinery and equipment sales tax exemption for R&D equipment purchases

#11 Legislative and budget-driven revenue changes from the 2023 legislative session

(1) No revenue or expenditures for 25H-Fair Start for Kids Account (FSKA).

(2) Based on the state constitution, no transfer of extraordinary revenue will occur in the 21-23 biennium because annual average state employment growth averaged less than one percent per fiscal year in the 19-21 biennium.

(3) The 2021-23 amount includes \$84 million for Gain Share.

(4) Reversion amounts are consistent with the ERFC's adopted budget outlook.

(5) SHB 1138 | Conditional transfer to bring 28E-1 to \$3 million balance, activated by Department of Ecology issuing drought emergency order.

 * GDP Price Index for Personal Consumption Expenditures
 # Consumer Price Index for all Urban Consumers
 + Consumer Price Index for the Seattle-Tacoma-Bremerton, WA CMSA
 Consumer Price Index and PCE Price Index values shown here are annual averages of seasonally
 adjusted quarterly data and may differ slightly from the annual values published by the Bureau of Labor
 Chatietia and Bureau of Consumer and Package Statistics and Bureau of Economic Analysis.

Glossary

Biennium: The state's two years budget cycle.

Cash Basis: Cash receipts received during a period. The Forecast Council forecasts revenues on a Cash and GAAP (Generally Accepted Accounting Principles) basis.

CPI: The Consumer Price Index for All Urban Consumers. The Bureau of Labor Statistics (BLS) updates the CPI monthly, surveying over 60,000 goods in 85 urban areas.

Tax Elasticity: A measure of how tax revenues respond to changes in personal income. If tax revenue elasticity is greater than one, a one percent change in personal income will be associated with more than a one percent increase in tax revenues. If elasticity is less than one, a one percent increase in personal income will be associated with less than a one percent increase in tax revenues.

Fiscal Year: The state's budget year. Washington State's fiscal year runs from July 1 through June 30. Fiscal year 2018, for example, ran from July 1, 2017 through June 30, 2018.

GAAP Basis: Generally Accepted Accounting Principles measure revenue in the period during which they accrue rather than the period in which they are received. General Fund: Accounts for all financial resources and transactions not accounted for in another fund.

General Fund-State (GF-S) Revenue: Resources from state sources only, excludes federal monies. The general fund is the principal state fund supporting the operation of the state.

Implicit Price Deflator, **PCE (IPD)**: The IPD for consumption is a by-product of the National Income and Product Accounts. It is derived by dividing current dollar (nominal) consumer expenditures by constant dollar (real) consumer expenditures.

Mortgage Rate: The average interest rate on 30-year conventional loan (as reported by Freddie Mac).

Near General Fund: All accounts included in the General Fund - State plus the Education Legacy Trust Account and the Washington Opportunity Pathways Account.

Non-Wage Income: Personal income other than from wages and salaries. The major components are: proprietor's income, transfer payments, and dividends, interest and rent.

Real GDP: Gross Domestic Production adjusted for the price level.

Revenue Act: Revenue Act taxes consist of the retail sales tax, use tax, business and occupation tax, public utility tax and tobacco products tax, plus penalty and interest payments associated with those taxes.

Personal Income: Income from wages and salaries; other labor income; proprietor's income; dividends, interest and rent; transfer payments; and a residence adjustment. It is reduced by employee contributions for social insurance.

Seasonally Adjusted: Adjusted for normal seasonal variations. Monthly statistics, such as the unemployment rate, are seasonally adjusted to make month-to-month comparisons possible.

Seasonally Adjusted Annual Rate: A rate for a given period that is typically less than one year, but that is computed as if the rate were for a full year and seasonally adjusted.

Nonfarm Payroll Employment: Civilian non-farm payroll employees. The self-employed, farm workers, members of the armed forces, private household employees, and workers on strike are excluded.
