Preface

ERFC forecasting structure and schedule

The Economic and Revenue Forecast Council is required by Chapter 231, Section 34, Laws of 1992 (RCW 82.33.020) to prepare a quarterly state economic and revenue forecast and submit it to the Forecast Council. This report presents the state's economic and General Fund-State revenue forecast. It is issued four times a year. The Washington State GF-S revenue forecast is prepared quarterly in conjunction with the state economic forecast for the Economic and Revenue Forecast Council. The Council consists of eleven members, two appointed by the Governor, eight appointed by the Legislature - two from each caucus of the Senate and House of Representatives, and the State Treasurer. Current members of the Economic and Revenue Forecast Council are listed inside the front cover of this publication. The GF-S revenue forecast is updated four times per year: March (February in evennumbered years), June, September, and November. The staff of the Economic and Revenue Forecast Council is responsible for the preparation of the state's economic forecast and the forecast of the Department of Revenue's GF-S revenue sources as well as GF-S revenue from fines and forfeitures collected by the Administrative Office of the Courts with GF-S share of court fees, fines, and forfeitures. The staff is also responsible for review and coordination of the revenue forecasts of other agencies that collect relatively large amounts of GF-S revenue. These are the Department of Licensing, the Office of the Insurance Commissioner, the Lottery Commission, the State Treasurer, the Liquor and Cannabis Board, and the Office of Financial Management. The Office of Financial Management is responsible for summarizing the forecasts of all other state agencies that collect relatively smaller amounts of GF-S revenue.

Forecast Procedure

For each quarterly update, the staff of the Economic and Revenue Forecast Council, under the direction of the Executive Director, reviews (and if warranted, modifies) a national economic forecast prepared by IHS Markit. A state economic forecast is then prepared using an econometric model that links Washington's economy to the national economy. After review by forecast workgroups; the Governor's Council of Economic Advisors; and the Economic and Revenue Forecast Council, this state economic forecast (updated for newly released data) is used to prepare a baseline revenue forecast for GF-S and the related funds. The forecasts are based on current law and administrative practices and do not reflect pending legal challenges to GF-S receipts until they are resolved. Additionally, at least two alternative forecasts are prepared for all GF-S and related fund sources and presented to the Forecast Council for approval. Once the Council approves the forecast, it becomes the official forecast of GF-S and related fund revenues.

Data in this publication are accurate through July 11, 2024.

Executive Summary

- The economy continues to expand although inflation remains elevated.
- We expect real GDP to increase 2.3% in 2024 and 1.8% in 2025, up from the
 2.0% and 1.7% growth rates assumed in the February forecast.
- Our forecast for real GDP growth in 2026-29 is based on the most recent long term forecast from Blue Chip which was released in March 2024. We expect growth rates of 2.0%, 2.0%, 1.9%, and 1.9% in 2026 through 2029.
- We expect the Federal Reserve to hold the federal fund rates steady at 5.25% to 5.50% until December 2024 when rates are slowly lowered.
- The Washington economy continued to expand through the first quarter of 2024.
- Washington employment growth continued into 2024.
- The Washington unemployment rate rose to 4.9% in May from 4.8% in April.
- Washington housing construction ticked up in the first quarter of 2024.
- Seattle home prices increased in April and were up 7.5% compared with April 2023.
- Washington exports decreased 6.9% from the first quarter of 2023 to the first quarter of 2024.
- Seattle consumer price inflation continued to outpace the national average in lune.
- Tracked revenue collections since February have come in close to their forecasted amounts.
- The June economic forecast of state personal income is lower through FY 2025 but higher in the following fiscal years. The forecast of housing permits is lower in all fiscal years. This has resulted in slight decreases in forecasted Revenue Act taxes in the current and next biennia and slight increases in the 2027-29 biennium.
- Forecasted real estate excise taxes have increased slightly due to higher-thanexpected taxable activity.
- Net receipts of capital gains taxes in FY 2024 were much lower than those of FY 2023 and have prompted a lower forecast going forward.
- Legislative and budget-driven revenue changes from the 2024 legislative session produced slight decreases in the current and next biennia and slight increases in the 2027-29 biennium.
- The forecast of funds subject to the budget outlook process was decreased by \$477 million in the 2023-25 biennium and \$189 million in the 2025-27 biennium but increased by \$96 million in the 2027-29 biennium.

U.S. Economic Forecast

The economy continues to expand

The economy continues to expand although inflation remains elevated. Economic growth recovered quickly from the pandemic with the help of fiscal and monetary policy. Strong demand fueled by policy responses, combined with ongoing supply issues caused inflation to spike. The Federal Reserve has combatted inflation by raising interest rates to slow economic activity and price growth. With inflation declining, the Federal Reserve shifted to a more accommodative stance. Recent high inflation readings, however, have delayed the assumption of rate cuts. Four years after the onset of COVID-19, the direct effects of the pandemic are no longer materially impacting the economy.

Our forecast was based on a modified version of the June S&P Global Market Intelligence forecast This forecast is based on a modified version of S&P Global Market Intelligence's June 2024 control forecast for the U.S. economy. We have adjusted real gross domestic product (GDP) to be consistent with the Blue Chip "Consensus" GDP forecast for 2024 and 2025. We expect real GDP to increase 2.3% in 2024 and 1.8% in 2025, up from the 2.0% and 1.7% growth rates assumed in the February forecast. Our forecast for real GDP growth in 2026-29 is based on the most recent long term forecast from Blue Chip which was released in March 2024. We expect growth rates of 2.0%, 2.0%, 1.9%, and 1.9% in 2026 through 2029 which is very close to the 2.1%, 1.9%, 1.9%, and 1.8% rates in the February forecast.

The Fed Funds rate of 5.25% to 5.50% is expected to be the peak The Federal Reserve has shifted from consistently raising rates to combat inflation to holding rates steady. The Federal Reserve last raised the target for the federal funds in July 2023. During this time, the economy has remained resilient with the labor market particularly tight. As inflation declined, the Federal Reserve adopted an easing bias in January 2024. Since then, however, inflation failed to decline further, diminishing the outlook for rate cuts. Our expectation is for the Federal Reserve to hold the rate steady at 5.25% to 5.50% until their final meeting of the year in December when rates are cut by 25 basis points. The February forecast assumed the first rate cut of the cycle would occur in the second quarter 2024. The rate cuts are expected to end in the second quarter of 2026 and then hold steady through 2029 at 2.50% to 2.75%. The forecast also calls for the Federal Reserve to continue reducing assets from its balance sheet, although they are now expected to do so at a slower pace than previously anticipated.

Washington Economic Forecast

The Washington economy continued to expand into 2024

The Washington economy continued to expand in the first half of 2024. In May, the Washington unemployment rate rose from 4.8% to 4.9%, up from the historic low of 3.8% in the second quarter of 2023. Washington housing permits were mostly flat for the first part of 2024. Home prices in Seattle are up 7.5% compared with April 2023. Washington exports decreased 6.9%

Executive Summary Page 2

from the first quarter of 2023 to the first quarter of 2024. Seattle consumer price inflation continued to outpace the national average in June 2024.

The Washington forecast features faster nominal personal income growth from 2025 – 2029 The Washington forecast features a slightly lower level of nominal personal income in 2024, but higher in the out-years compared to the February forecast, but lower employment throughout the forecast period. We expect a 5.3% increase in nominal Washington personal income this year, down from 5.4% in the February forecast. We expect a 1.3% increase in Washington employment this year, down from the 1.4% growth rate expected in the February forecast. We expect similar employment growth as the growth forecasted in the February forecast. By 2029, we forecast 1,000 more jobs than the February forecast. We expect housing permits to total 37,000 units this year, down from the February forecast, and we expect permits to average 43,000 units in 2025 through 2029, down from the 45,400 units in the February forecast. We expect the Seattle headline inflation to be 3.3% this year, up from 3.1% in the November forecast. We expect Seattle inflation to average 2.6% in 2025, up 0.5 percentage points from the February forecast. The Seattle CPI growth rate is predicted to gradually decline to 2.2% by 2029.

Revenue Forecast

Revenue collections have come in close the forecast but the economic forecast is slightly weaker than the previous forecast in the near term

Total tracked revenue collections since February have come in close to their forecasted amounts. The June economic forecast projects slightly lower personal income than expected in February in FY 2024 and 2025 but higher income in fiscal years 2026 through 2029. Projected housing permits, however, are lower throughout the forecast period. These factors, along with observed recent activity, have resulted in decreases in forecasted Revenue Act taxes through fiscal year 2027 and slight increases thereafter. Forecasted real estate excise taxes have increased slightly due to the higher-than-expected taxable activity and lower forecasted mortgage rates. Net receipts of capital gains taxes in FY 2024 were much lower than those of FY 2023 and have prompted a lower forecast going forward. Legislative and budget-driven revenue changes from the 2024 legislative session produced slight decreases in the current and next biennia and slight increases in the 2027-29 biennium.

Total forecast change by biennium (millions):

23-25: -\$477 25-27: -\$189 27-29: +\$96 Forecasted revenue was decreased by \$476.7 million in the 2023-25 biennium and \$189.0 million in the 2025-27 biennium but increased by \$96.1 million in the 2027-29 biennium. A portion of the forecast revision was due to legislation and budget-driven revenue changes from the 2024 session. These changes subtracted \$33.9 million in expected revenue from the current biennium and \$36.9 million from the next biennium but added \$33.8 million to revenue for the 2027-29 biennium. The June 2024 forecast for funds subject to the budget outlook process total \$66,528.4 million in the 2023-25 biennium, \$71,532.2 million in the 2025-27 biennium and \$77,044.4 million in the 2027-29 biennium.

Executive Summary Page 3

Chapter 1: U.S. Economy - Current Conditions and Forecast

- The economy continues to expand although inflation remains elevated.
- Policymakers approved trillions of dollars of fiscal and monetary support in response to the COVID-19 pandemic.
- Real GDP increased 1.4% (SAAR) in the first quarter of 2024 after increasing 3.4% (SAAR) in the fourth quarter of 2023.
- The job market has been stronger than expected.
- Housing activity is slowing; manufacturing output is declining.
- Oil prices have increased, although we expect them to decline throughout the forecast period.
- We expect real GDP to increase 2.3% in 2024 and 1.8% in 2025, up from the 2.0% and 1.7% growth rates assumed in the February forecast.
- Our forecast for real GDP growth in 2026-29 is based on the most recent long term forecast from Blue Chip which was released in March 2024. We expect growth rates of 2.0%, 2.0%, 1.9%, and 1.9% in 2026 through 2029.
- We expect the Federal Reserve to hold the federal fund rates steady at 5.25% to 5.50% until December 2024 when rates are slowly lowered.
- The uncertainty in the baseline forecast is elevated. Downside risks outweigh upside risks.

Current Conditions

The economy continues to expand

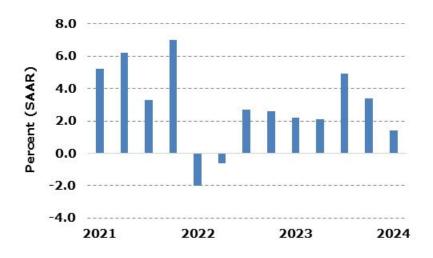

The economy continues to expand although inflation remains elevated. Economic growth recovered quickly from the pandemic with the help of fiscal and monetary policy. Strong demand fueled by policy responses, combined with ongoing supply issues caused inflation to spike. The Federal Reserve has combatted inflation by raising interest rates to slow economic activity and price growth. With inflation declining, the Federal Reserve shifted to a more accommodative stance. Recent high inflation readings, however, have delayed the assumption of rate cuts. Four years after the onset of COVID-19, the pandemic is no longer materially impacting the economy.

Policymakers approved trillions of dollars of fiscal and monetary support in response to the COVID-19 pandemic. Stimulus

Policymakers approved trillions of dollars in stimulus related to the pandemic consisted of \$6.21 trillion in six major categories. Business support (\$1.56 trillion), income support (\$983 billion), state and local government funding (\$870 billion), direct payments (\$859 billion), tax policy changes (\$772 billion), and health spending (\$700 billion). The remainder of the spending is comprised of grants, loans, direct payments, and other federal funding for activities to provide relief from COVID-19.

GDP increased 1.4% in the first quarter Real GDP growth slowed in the first quarter. Real GDP increased 1.4% (SAAR) in the first guarter of 2024 after increasing 3.4% (SAAR) in the fourth quarter (see Figure 1.1). Growth was led by consumer spending on services and residential fixed investment. Consumption grew 1.5% (SAAR) contributing 1.0 percentage points to overall GDP growth. Consumer spending on services grew 3.3% (SAAR) adding 1.5 points to topline GDP. Spending on goods declined by 2.3% (SAAR), subtracting 0.5 points from growth. Fixed investment grew 7.0% (SAAR) from 3.5% (SAAR) in the fourth guarter and added 1.2 points to topline growth. Nonresidential fixed investment increased 4.4% (SAAR), led by 7.7% (SAAR) growth in intellectual property products. Residential investment rebounded in the first quarter, growing 16.0% (SAAR) after 2.8% (SAAR) growth in the fourth quarter and added 0.6 points to overall GDP growth. Import growth outpaced exports, with the net impact of 0.7 points subtracted from GDP growth. Government spending increased 1.8% (SAAR), increasing GDP by 0.3 points. The change in inventories subtracted 0.4 points to GDP growth in the first quarter.

Figure 1.1: Real GDP Growth

Source: U.S. Bureau of Economic Analysis; data through 2024 Q1

The job market has been stronger than expected

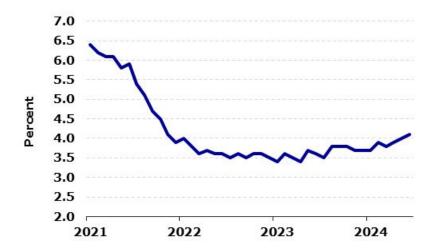

The job market continues to outpace consensus expectations. Over four years since the unprecedented 20.5 million job decline in April 2020 due to the pandemic, employment has continued to grow. In June, total nonfarm employment increased by 206,000 jobs after increasing by 218,000 jobs the month before. Over the

past twelve months, job growth has averaged 218,000. Construction employment has remained resilient and increased by another 27,000 jobs in June. The manufacturing sector has been trending down and declined by 8,000 jobs in June. Private service-providing employment increased by 117,000. Employment increases in the service sector were led by an 82,400 increase in health care and social assistance. Temporary help services was the weakest sector in June, declining by 48,900 jobs. Government payrolls increased by 70,000.

The unemployment rate is increasing

The unemployment rate is increasing (see Figure 1.2). In June, the unemployment rate increased 0.1 percentage points to 4.1% and is up 0.5 percentage points since last year. The labor force participation rate improved to 62.6% in June from 62.5% the month before. The rate plummeted to 60.1% during the pandemic from an initial rate of 63.3%. Since the initial recovery, the labor force participation rate has leveled off and remains below pre-pandemic levels. Average hourly earnings are up \$1.30 from a year ago to \$35.00 while the average workweek fell 0.1 hours from last year to 34.3 hours in June.

Figure 1.2: Unemployment Rate

Source: U.S. Bureau of Labor Statistics; data through June 2024

Consumer confidence is declining

Consumer confidence is declining. Consumer confidence as measured by the Conference Board declined 0.9 points in June and is down 9.7 points since last year. An increase in consumers' view of present conditions was offset by a decline in expectations. Confidence is being supported by a strong labor market while concerns about business conditions are increasing. The University of Michigan Consumer Sentiment index fell 0.9 points as well in June but remains up 4.0 points since last year. Consumers expressed more pessimism towards both present conditions and expectations. Both confidence measures remain well below pre-pandemic levels.

Oil prices are increasing

Oil prices are increasing due to solid demand and constrained supply growth. OPEC+ is has pushed prices up in the short term with productions cuts that are scheduled to stay in place through September. Uncertainty related to the Israel – Hamas war remain even as the threat of contagion to surrounding countries have eased. The Brent spot crude price is now \$88 per barrel to start July, up \$11 from a year ago. The West Texas Intermediate (WTI) price has increased to \$85 per barrel from \$72 per barrel since last year. U.S. oil production has plateaued since reaching an all-time high in November of 13.295 million bpd. U.S. production in April was 13.248 million bpd, up from 13.176 the prior month. The Baker Hughes rig count has been declining since reaching a peak in November 2022. As of July 5th, the rig count in the U.S. was 585, down 95 since last year.

Inflation eased in June

Inflation eased in June after months of stagnation. After peaking at 9.1% in June 2022, inflation declined as the Federal Reserve has raised rates. Since then, inflation has remained 3% or higher in each of the past thirteen months. Rents have accelerated in lagged response to soaring home prices and a supply/demand imbalance in rental housing. Wage increases in response to higher consumer inflation have kept overall inflation more persistent. The Consumer Price Index (CPI) declined in June 0.1% on a seasonally adjusted basis, the first monthly decline in four years. Year-over-year, CPI was up 3.0% in June, down from 3.3% in May (see Figure 1.3). Energy prices declined 2.0% in June and are up just 1.0% over the year. Shelter cost inflation remains high, increasing 0.2% in June and up 5.2% since last year. Food price inflation has moderated, up 0.2% in June and up 2.2% since last year. Core consumer prices, which exclude food and energy, increased 0.1% since last month and were up 3.3% over the year.

Figure 1.3: Consumer Price Index

Source: U.S. Bureau of Labor Statistics; data through June 2024

Home prices are increasing

Home prices are increasing. The seasonally adjusted S&P CoreLogic Case-Shiller National Home Price Index increased 0.3% in April and is now up 6.3% since last year. With inflation remaining persistently high, the Federal Reserve has raised interest rates substantially. This has led to a rapid rise in

mortgage rates which has caused affordability to plummet. The rate on a 30-year mortgage has eased since the end of last year to 6.95% as of July 3rd, down from recent peak of 7.79% in October 2023, but still well above pre-pandemic levels. Despite the drop in affordability, home prices have remained resilient due to a limited supply of homes for sale. Lumber prices have stabilized close to pre-pandemic levels. The random length lumber price reached an all-time high \$1,671 per 1,000 board feet in May 2021. Prices have trended down since then and are now at \$478 as of July 8th. Homebuilder confidence has declined in recent months. In June, homebuilder confidence fell from 45 to 43 (readings above 50 indicate optimism), the second consecutive increase.

Housing activity is slowing

Housing activity is slowing as headwinds have persisted. High interest rates, low confidence, and low affordability have weighed down new construction. Housing starts declined in May by 5.5% and are down 19.3% since last year. Single-family starts are 1.7% lower than a year ago, and multi-family starts are down 52.4%. Builders are working through a large backlog of permitted but not started units and there is a near record number of housing units currently under construction. The inventory of new homes on the market has trended up as builders have struggled to sell new construction. In May there were 9.3 months' worth of supply, up from 8.1 in April, and up from 6.9 a year ago. Housing permits declined 2.8% over the month in May and are down 8.7% since last year. Single-family permits are up 4.1% since last year while multi-family permits are down 27.9%. New home sales declined 11.3% in January to 698,000 (SAAR) and are down 16.5% since last year.

The manufacturing sector is contracting

The manufacturing sector continues to contract. The Institute for Supply Management (ISM) Report on Business index declined 0.2 points to 48.5 in June (index values below 50 indicate contraction). The index has indicated contraction in manufacturing sector in 19 of the past 20 months. The new orders component improved 3.9 points to 49.3. Production fell into contraction territory to 48.5, 1.7 points below last month. The employment component also turned negative, dropping 1.8 points to 49.3. Eight of the 17 manufacturing industries reported growth in June with the remaining indicating contraction. Unlike the ISM report, the latest G-17 report from the Federal Reserve indicates manufacturing output rose 0.9% in May and is up 0.1% from a year ago. Durable goods increased 0.6% while nondurable goods increased 1.1% from the prior month. New orders for core capital goods (nondefense capital goods excluding aircraft) declined 0.6% in May but remain up 0.9% from a year ago.

U.S. exports increased in the first quarter

U.S. exports increased for the first quarter of 2024, growing by 0.1% year over year. U.S. exports to our three largest export partners declined since last year. Exports to Canada and Mexico each declined 1.1% year-over-year and exports to China declined 4.9%. Partially offsetting some of this decline was a 17.2% year-over-year increase to the Netherlands, our fourth

largest trade partner. Exports of transportation equipment grew 3.9% in the first quarter and remained the top export by value for the United States.

Forecast

Our forecast was based on a modified version of the June S&P Global Market Intelligence forecast This forecast is based on a modified version of S&P Global Market Intelligence's June 2024 control forecast for the U.S. economy. We have adjusted real gross domestic product (GDP) to be consistent with the Blue Chip "Consensus" GDP forecast for 2024 and 2025. We expect real GDP to increase 2.3% in 2024 and 1.8% in 2025, up from the 2.0% and 1.7% growth rates assumed in the February forecast. Our forecast for real GDP growth in 2026-29 is based on the most recent long term forecast from Blue Chip which was released in March 2024. We expect growth rates of 2.0%, 2.0%, 1.9%, and 1.9% in 2026 through 2029 which is very close to the 2.1%, 1.9%, 1.9%, and 1.8% rates in the February forecast.

The forecast includes key assumptions related to fiscal policy

The forecast includes key assumptions related to fiscal policy. The debt ceiling is suspended through 2024 and is raised without incident in 2025. Personal taxes are governed by current policy, which includes an extension beyond the expiration of provisions at the end of 2025 in the 2017 Tax Act. Corporate taxes, however, are governed by current law, including the Inflation Reduction Act and phase outs of provisions in the 2017 Tax Act. Social Security and Medicare benefits are paid beyond the projected exhaustion of those funds. One quarter of the \$95 billion foreign aid package (HR 815) acts as a boost to U.S. GDP growth. The forecast includes tariffs enacted by the U.S. and China since 2017 that are still in effect. The forecast reflects all legislation enacted through the time of the forecast.

The projection for population has been raised

The projection for population has been raised through 2029 compared to the February forecast. We have assumed faster growth of immigration over recent history and in the forecast. The faster growth is more closely aligned with new estimates from the Congressional Budget Office.

Oil prices are expected to be higher compared to the previous forecast Oil prices are expected to be higher compared to the February forecast (see Figure 1.5). Record-high U.S. production has offset efforts by OPEC+ to keep prices propped up by limiting supply. Geopolitical conflicts have continued around oil producing nations. The refiner acquisition price of crude oil in 2024 is expected to average \$77 per barrel, up from \$72 per barrel assumed in February. Going forward, supply restrictions are expected to be modest, and increased U.S. production will keep prices in check as demand increases. We expect oil prices to decline throughout the forecast reaching \$65 per barrel in 2029. The February forecast expected oil prices to reach \$64 per barrel in 2029.

February

Inflation is expected to fall

Inflation (as measured by the price index for personal consumption expenditures) is expected to fall to 2.6% this year from 3.7% in 2023. The February forecast expected inflation to fall to 2.0% this year. Inflation has come down after the initial surge as demand recovered faster than could be accommodated by supplies of commodities and labor was disrupted by the pandemic. Income support helped fuel the surge in demand, contributing to the increase in prices. Inflation is expected to remain low throughout the forecast. The forecast calls for inflation to average 2.2% from 2025 through 2029. Core inflation (excluding food and energy) is expected to be higher than topline inflation this year at 2.9%. We expect core inflation to trend down and average 2.3% from 2025 through 2029.

Consumer spending growth is expected to increase Real consumer spending growth is expected to increase this year to 2.3% from 2.2% in 2023. The February forecast expected real consumption growth to increase to 2.5% this year. The strong labor market has been offset by persistently high inflation, which has weighed on consumer sentiment. Consumers are also still willing to fund current spending with savings as real incomes have not kept up. This has pushed the personal saving rate to below 4.0% this year. In the decade prior to the pandemic, the saving rate averaged 6.2%. Real consumer spending is expected to slow to 1.9% next year. The previous forecast expected growth of 1.6% next year. The forecast calls for growth to then increase and average 2.0% from 2026 through 2029.

Employment growth is expected to slow

Employment growth is expected to slow, although not as much as previously expected in the February forecast (see figure 1.5). Employment grew 2.3% in 2023 after growing 4.3% in 2022. We expect employment growth of 1.7% this year as the labor market cools. The previous forecast expected growth of 1.2% in 2024. Employment growth is expected slow further and average 0.3% in 2025 through 2029. We expect the labor market to

remain tight throughout the forecast. The June forecast calls for the unemployment rate to increase slightly to 3.9% this year from a historic low of 3.6% in 2022 and 2023. The forecast calls for the unemployment rate to increase to 4.0% in 2025 and then average 4.3% in 2026 through 2029.

Figure 1.5: Nonfarm Payroll Employment

Source: U.S. Bureau of Labor Statistics, June 2024 ERFC forecast; historical data through 2024 $\mathrm{Q}1$

Business investment is expected to slow Real nonresidential fixed investment growth is expected to slow to 3.9% this year after growing 4.5% in 2023. Higher expected borrowing costs due to the assumption of delayed rate cuts by the Federal Reserve is expected to limit investment. Lending standards for businesses are still tightening and borrowing costs remain elevated. Business spending on manufacturing structures is slowing. Office vacancy rates appear to have plateaued, but remain high as the shift to flexible work environments is likely permanent. Going forward, real nonresidential fixed investment growth is expected to continue to slow. We expect real nonresidential fixed investment to average 2.3% from 2025 through 2029. We expect real nonresidential construction to grow 4.1% this year after rebounding by 12.7% in 2023. The forecast calls for nonresidential construction to slow and average 1.3% in 2025 through 2029 as some excess surplus gets worked through. We expect real nonresidential construction to have fully recovered to its level before the pandemic by the middle of 2025. Real equipment investment is expected to return to growth this year at 2.4% after declining 0.3% in 2023. We then expect growth to accelerate and average 3.5% in 2025 through 2029. Investment in intellectual property products is expected to increase from 4.5% growth in 2023 to 5.2% growth this year. We expect growth to trend down and average 1.6% from 2025 through 2029.

The housing market outlook remains weak

The housing market outlook remains weak. High mortgage rates have lowered affordability and weighed down housing demand. In response, buyers have switched to adjustable-rate mortgages which make up twice the share of all mortgages compared to

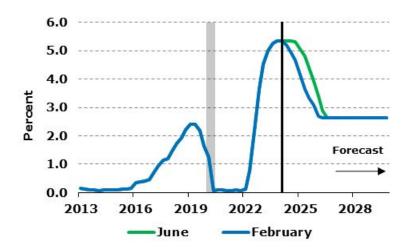

four years ago. As rates have remained high, payments have reset at higher levels, further reducing affordability. High rates have also locked in homeowners holding fixed-rate mortgages financed at lower rates and lowered supply. Labor and material shortages remain, causing delays in finished construction. The June forecast calls for housing starts to decline 2.8% this year, down from a 1.5% increase in the previous forecast. We expect multi-family housing to decline 26.0%, offsetting an 8.8% increase in single-family. We expect 2024 to be the trough in total housing starts at 1.38 million units. The forecast then calls for housing starts to slowly trend up throughout the remainder of the forecast and average 1.44 million units in 2029.

Growth in major U.S. trading partners is expected to be stronger compared to February

Economic growth of U.S. major trading partners is expected to be stronger compared to the previous forecast. The June forecast calls for 2.3% growth this year compared to 2.0% growth in the previous forecast. Real GDP growths forecasts for this year have been revised up in some major economies, particularly in the eurozone and the United Kingdom. Growth in China and Russia have also been revised up. We expect growth in U.S. major trading partners to reach 2.6% in 2025, up from 2.5% in the February forecast. The forecast then calls for global growth to slowly trend down and reach 2.4% in 2029. Real U.S. export growth is forecasted to increase to 2.0% this year, down from 2.6% growth in 2023. We expect real export growth to increase to 4.9% in 2027 before trending down throughout the remainder of the forecast and reaching 3.6% growth in 2029.

The Fed Funds rate of 5.25% to 5.50% is expected to be the peak The Federal Reserve has shifted from consistently raising rates to combat inflation to holding rates steady. The Federal Reserve last raised the target for the federal funds in July 2023. During this time, the economy has remained resilient with the labor market particularly tight. As inflation declined, the Federal Reserve adopted an easing bias in January 2024. Since then, however, inflation failed to decline further, diminishing the outlook for rate cuts. Our expectation is for the Federal Reserve to hold the rate steady at 5.25% to 5.50% until their final meeting of the year in December when rates are cut by 25 basis points. The February forecast assumed the first rate cut of the cycle would occur in the second quarter 2024 (see Figure 1.6). The rate cuts are expected to end in the second quarter of 2026 and then hold steady through 2029 at 2.50% to 2.75%. The forecast also calls for the Federal Reserve to continue reducing assets from its balance sheet, although they are now expected to do so at a slower pace than previously anticipated.

Figure 1.6: Fed Funds Target Rate

Source: U.S. Federal Reserve, June 2024 ERFC forecast; historical data through 2024 $\mathrm{Q}1$

Table 1.1 provides a fiscal year summary of the U.S. economic indicators. For calendar year tables, see the appendix.

Risks to the Forecast

The level of uncertainty in the baseline forecast remains elevated. Downside risks outweigh upside risks.

Downside Risks

- Israeli Hamas conflict spreads throughout the region
- War in Ukraine escalates
- Inflation remains elevated
- COVID-19 infections reemerge
- Re-imposition of some social restrictions
- New travel restrictions
- Rising mortgage rates cause a sharp downturn in affordability and housing activity
- Oil prices don't decline
- Increasing geopolitical tensions negatively affect consumer confidence
- Deficit fears or debt limit fiscal policy
- A breakdown in trade relations
- Global growth weakens, pulling exports down
- Increased uncertainty in financial system due to banking collapse

Upside Risks

- Inflation declines faster than expected
- Federal Reserve cuts rates sooner than expected
- War in Ukraine ends
- Israeli Hamas conflict ends
- Energy prices decline faster than expected

- Increased business confidence leads to more hiring
- Increased consumer confidence gives a boost to consumer spending
- Housing sector improves faster than anticipated
- China successfully transitions to a more consumptionbased economy
- European and emerging market economies grow faster than expected
- Wage growth picks up faster than expected

Chapter 2: Washington Economy – Current Conditions and Forecast

- The Washington economy continued to expand through the first quarter of 2024.
- · Washington employment growth continued into 2024.
- The Washington unemployment rate rose to 4.9% in May from 4.8% in April.
- Washington housing construction ticked up in the first quarter of 2024.
- Seattle home prices increased in April and were up 7.5% compared with April 2023.
- Washington exports decreased 6.9% from the first quarter of 2023 to the first quarter of 2024.
- Seattle consumer price inflation continued to outpace the national average in June.

Current Conditions

The Washington economy continued to expand into 2024

The Washington economy continued to expand in the first half of 2024. In May, the Washington unemployment rate rose from 4.8% to 4.9%, up from the historic low of 3.8% in the second quarter of 2023. Washington housing permits were mostly flat for the first part of 2024. Home prices in Seattle are up 7.5% compared with April 2023. Washington exports decreased 6.9% from the first quarter of 2023 to the first quarter of 2024. Seattle consumer price inflation continued to outpace the national average in June 2024.

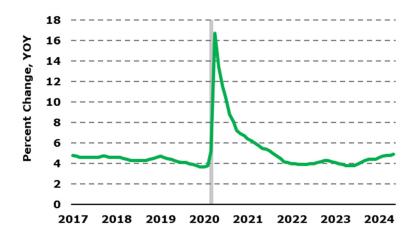

Washington nonfarm payroll employment increased 42,800 in the first six months of 2024 We have six months of new Washington employment data since the February forecast was released. Employment growth has been stronger than expected compared to the previous forecast. Total seasonally adjusted nonfarm payroll employment increased by 42,800 in the first half of 2024. The February forecast called for growth of 18,200 over the same time period. Government employment grew by 11,000. Private service providing employment increased 23,000 since December, led by a 10,800 job gain in education and health services. For the six-month period, construction employment grew by 5,700 and

manufacturing adding 3,300 jobs. Aerospace product and equipment manufacturing employment growth made up the largest share of manufacturing growth, with 2,100 jobs added.

Revisions reduced the level of employment We have also incorporated another quarter of benchmark employment data from the Quarterly Census of Employment and Wages (QCEW). The new QCEW data and other revisions to employment data subtracted 32,800 (-0.9%) to the estimated level of total employment in December 2023. Approximately 11,100 of the revision came from a misclassification of gig drivers that was erroneously included in the employment numbers and has since been corrected. The lower revisions combined with the stronger than expected job growth since the previous forecast has resulted in June employment being 8,300 lower than assumed in February.

Washington's unemployment rate has steadily increased Washington's unemployment rate has steadily increased for the past year, increasing 1.1 percentage points from a year ago (see Figure 2.1). The unemployment rate increased to 4.9% in May from 4.8% in April. The jobless rate was near a historic all-time low at 3.8% during the second quarter of 2023. Labor force participation dropped to 63.7% in May, which is down from 64.5% a year ago.

Figure 2.1 Washington Unemployment Rate

Source: Employment Security Department, data through May 2024

Washington initial claims increased in June

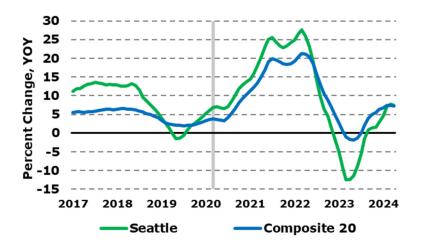

Washington initial claims for unemployment insurance increased in June. The seasonally adjusted number of initial claims totaled 25,700, an increase of 5% compared to June 2023.

Washington housing permits increased in the first quarter of 2024

Seattle-area home prices increased in April Washington housing permits ticked up in the first quarter of 2024. A total of 38,000 units (SAAR) were permitted in January, February, and March, up from 34,500 units (SAAR) in the fourth quarter. Permits in the first quarter consisted of 20,600 single-family units and 17,400 multi-family units. The February forecast assumed 38,750 units for the first quarter, consisting of 21,220 single-family units and 17,520 multi-family units.

According to the S&P/Case-Shiller Home Price Indices, Seattlearea home prices increased 0.1% in April which was lower than then the 0.4% composite-20 increase. Home prices in Seattle are up 7.5% compared with April 2023 (see Figure 2.2). In comparison, the composite-20 index was up 7.2% year-over-year in April.

Figure 2.2: S&P/Case-Shiller Home Price Indices, SA

Source: S&P/Case-Shiller Home Price Indices; data through April 2024

Washington exports decreased 6.9% from the first quarter of 2023 to the first quarter of 2024 According to the World Institute for Strategic Economic Research (WISER), Washington exports decreased 6.9% from the first quarter of 2023 to the first quarter of 2024 (see Figure 2.3). Transportation equipment exports and agricultural exports both declined from this period last year, falling 18.1% and 4.1% respectively. Declines to those products were partially offset by a 54.2% increase to exports of petroleum and coal products.

Washington car and truck sales fell Washington car and truck sales declined in June. Sales growth has been relatively flat since last summer until the recent fall. The seasonally adjusted number of new vehicle registrations fell 9.3% in June to 246,300 (SAAR). Passenger car registrations fell 7.5% while light truck registrations decreased 21.9%. The number of total registrations remained down 14.9% over the year in June.

Total

Washington personal income growth trailed the national average in the first quarter of 2024 In July, the U.S. Department of Commerce, Bureau of Economic Analysis (BEA) released the preliminary state personal income estimates for the first guarter of 2024. Washington personal income increased from \$635.6 billion (SAAR) in the fourth guarter of 2023 to \$645.1 billion in the first guarter of 2024. The 6.1% increase (SAAR) in Washington personal income was the 15th lowest among the states and District of Columbia and trailed the 7.0% (SAAR) rate of increase for the U.S. as a whole. Growth in Washington wages trailed the U.S. in the first quarter, with Washington wages increasing 4.1% (SAAR) compared to 5.5% (SAAR) for the nation. Dividends, interest, and rent grew 5.4% (SAAR) in Washington compared to 6.0% (SAAR) for the nation. Growth in transfer payments was strong for both Washington and the nation, increasing 18.4% (SAAR) and 16.8% (SAAR) respectively. The increase in transfer receipts in the first quarter of 2024 reflected a 3.2% cost-of-living adjustment for social security recipients, along with increases in refundable tax credits and Medicaid benefits.

Seattle consumer price inflation outpaced the national average in June 2024 Seattle-area consumer price inflation continues to outpace the national average. From June 2023 to June 2024, the Seattle CPI rose 3.8% compared to the 3.0% increase in the U.S. City average index. Inflation has come down sharply since reaching a peak in June of last year at 10.1% for Seattle and 9.1% for the U.S. Shelter costs in both Washington and the U.S. continue to outpace topline inflation, increasing 5.2% and 5.1% respectively.

Core inflation (excluding food and energy) remains elevated. Seattle core CPI rose 4.4% in June compared to 3.3% for the U.S. City average.

Washington State Forecast

The Washington forecast features faster nominal personal income growth from 2025 – 2029 The Washington forecast features a slightly lower level of nominal personal income in 2024, but higher in the out-years compared to the February forecast, but lower employment throughout the forecast period. We expect a 5.3% increase in nominal Washington personal income this year, down from 5.4% in the February forecast. We expect a 1.3% increase in Washington employment this year, down from the 1.4% growth rate expected in the February forecast. We expect similar employment growth as the growth forecasted in the February forecast. By 2029, we forecast 1,000 more jobs than the February forecast. We expect housing permits to total 37,000 units this year, down from the February forecast, and we expect permits to average 43,000 units in 2025 through 2029, down from the 45,400 units in the February forecast. We expect the Seattle headline inflation to be 3.3% this year, up from 3.1% in the November forecast. We expect Seattle inflation to average 2.6% in 2025, up 0.5 percentage points from the February forecast. The Seattle CPI growth rate is predicted to gradually decline to 2.2% by 2029.

Washington Payroll Employment

Job growth is slightly stronger than in February from 2025-29

We expect slightly weaker job growth this year, but slightly stronger growth from 2025 through 2029 than in the February forecast (see Figure 2.4). Washington employment is expected to increase 1.3% this year, which is slightly below the 1.4% growth rate expected in the February forecast. We forecast employment growth to average 1.0% from 2025 through 2029, compared with 0.9% average annual growth expected in the February forecast. Forecasted payroll employment is nearly unchanged by the end of the forecast period (2029). We are projecting 1,000 more nonfarm payroll jobs for 2029 in the June forecast than we forecasted in the February forecast.

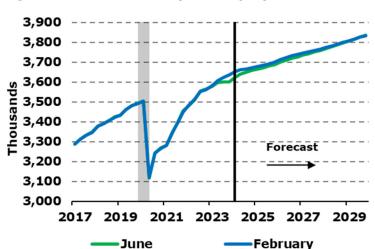

Figure 2.4: Nonfarm Payroll Employment

Source: Employment Security Department, ERFC; historical data through 2024 Q1

Aerospace employment is increasing After the grounding of the 737 Max and then the pandemic, Washington's aerospace employment declined from 89,600 at the end of 2019 to a low of 66,700 in August 2021, a loss of 22,800 jobs. Since August 2021, the industry added back 16,000 jobs, bringing the level to 82,800 in June 2024. We expect aerospace employment to continue to expand in Washington, reaching a total of 89,300 jobs by the end of 2029. On an annual average basis, we expect aerospace employment to grow 5.2% this year and 1.0% in 2025, 5.2% in 2026, then slowing to 2.6% in 2027, 0.7% in 2028 and -0.2% in 2029.

Software jobs are rebounding from a recent decline Software sector employment in Washington peaked in early 2023 at 88,500 jobs and proceeded to shed 4,500 that year. The fortunes of this sector reversed in the first half of 2024. The sector added 2,200 jobs so far this year and is up to 86,700 in June 2024. We expect growth to continue during the remainder of the forecast with growth rates of 2.4% in 2025, 1.5% in 2026, 2.3% in 2027, 2.3% in 2028, and 1.9% in 2029.

Construction employment is expected to increase through 2029 Construction has recovered more than all the jobs lost in the recession because of a surge in residential construction which peaked in 2021. As of June 2024, construction employment was 4.8% higher than at its prior peak in February 2020. We expect construction employment to continue to expand throughout the forecast period, rising to 275,200 by 2029. On an annual basis, we expect construction employment to grow by 3.3% in 2025, 3.2% in 2026, 3.5% in 2027, 3.3% in 2028, and 3.2% in 2029.

Washington Personal Income

Our forecast for nominal personal income growth this year is 5.5% There is little change to near term forecast of nominal personal income growth this year. We forecasted 5.3% growth in the June forecast, down a little bit from 5.4% in the February forecast (see Figure 2.5). Our current forecast of nominal personal income growth is 5.5% in 2025, 6.5% in 2026, 5.5% in 2027, 5.3% in 2028, and 5.3% in 2029. These forecasted growth rates are slightly higher than the February forecast. The expected 2029 nominal personal income is \$6.4 billion greater than the 2029 forecasted amount from the February forecast.

Washington Building Permits

The Washington housing permit forecast is lower in 2024 than in February The Washington housing permit forecast for 2024 is lower than in February but the growth rate is higher in out-years. The number of authorized housing units reached 56,900 in 2021 which was the highest annual total since 1978. Permits declined throughout 2022 and 2023 and averaged 49,000 and 37,100 respectively. We believe permits will begin to recover in 2025. In February, we forecasted a rebound in 2024, but now we don't expect to see rebound until 2025, but continued modest growth afterwards. On a calendar year basis, we expect 39,900 units in 2025, 42,000 units in 2026, 43,600 units in 2027, 44,500 units in 2028 and 45,100 units in 2029.

Consumer Price Index

Seattle consumer price index remains elevated in 2024

Inflation growth is down from last year but remains stubbornly elevated. The near-term inflation outlook has increased since the February forecast, but we expect price pressures to continue to diminish into 2025. The Seattle CPI peaked at 10.1% in June

2022 which was the highest rate since the 1980s but has generally trended down since that time. On an annual average basis, inflation will slow to 4.0% this year, up 0.7 percentage points from the February forecast (see Figure 2.6). We expect Seattle inflation to average 2.6% in 2025, up 0.5 percentage points from the February forecast. The Seattle CPI growth rate is predicted to gradually decline to 2.2% by 2029.

Alternative Scenarios

Alternative forecasts are required by law In accordance with state law, the Washington State Economic and Revenue Forecast Council adopted a forecast based on optimistic assumptions and a forecast based on pessimistic assumptions in addition to the baseline forecast.

Optimistic

In the optimistic scenario, stronger consumer spending, stronger productivity and a faster resolution of the Russia-Ukraine conflict drive faster growth

The optimistic scenario assumes stronger growth of consumer spending and stronger productivity relative to baseline. We assume that balance sheet issues in the banking sector continue to be successfully managed and that large deposit withdrawals do not repeat, allowing financial institutions to continue to support the economy through solid growth of credit. Moreover, a subsidence in the fighting in the Russia-Ukraine conflict and in the conflict in the Middle East allows for a lower path of energy prices, while firms are able to effect large productivity gains, improving corporate profitability. GDP rises 0.9 percentage points faster than the baseline through 2025, aided by reduced

uncertainty over a government shutdown in the fall. The economy then grows below trend through 2028. GDP rises on average 2.7% over 2024 and 2025, versus 2.1% in the base.

The optimistic scenario also assumes a stronger Washington economy

In addition to reflecting the impact of the stronger U.S. forecast on the state economy, the optimistic scenario assumes that aerospace employment grows significantly faster than assumed in the baseline. Software employment also grows more rapidly than in the baseline forecast. In the optimistic scenario, the stronger regional economy drives Seattle consumer price inflation above the baseline. Washington average wage growth is also higher in the optimistic scenario than in the baseline. Construction employment also grows more rapidly in 2024-2029 than in the baseline forecast. Washington nonfarm payroll employment in 2029 is higher by 72,800 jobs (1.9%) than in the baseline forecast and Washington personal income is \$35.3 billion (4.1%) higher.

Pessimistic

Growth slows as consumer spending weakens

The pessimistic scenario is characterized by a slight decline in both consumer spending and in GDP, compared to a growth slowdown in the baseline. Underlying this narrative is the assumption that balance sheet strains in the banking sector led financial institutions to severely tighten lending standards and curtail credit expansion. As a result, credit-dependent consumer spending and small business activity suffer greatly. Moreover, higher energy prices due to a worsening in the conflicts currently underway in Ukraine and in the Middle East weigh heavily on businesses and households. GDP declines in the second half of 2024, versus average growth of 1.7% in the baseline, and recovers weakly thereafter, remaining subdued relative to the baseline through late 2025. On an annual basis, GDP growth averages an unimpressive 1.1% through 2025, versus growth averaging 2.1% in the base case over 2024 and 2025.

The pessimistic scenario also assumes a weaker local economy

In addition to reflecting the impact of the weaker U.S. forecast on the state economy, aerospace employment peaks in the second quarter of 2024 and then declines. Software employment also peaks in 2024 and remains essentially flat over the forecast period. Construction employment peaks in the fourth quarter of 2024 and then reductions continue through 2027 when growth resumes. The relatively weak local economy also puts downward pressure on Washington wages and the Seattle CPI. Washington nonfarm payroll employment in 2029 is 196,900 (5.2%) lower than in the baseline forecast and Washington personal income is \$86.9 billion (10.2%) lower.

Table 2.2 compares the optimistic and pessimistic forecasts with the baseline forecast.

Governor's Council of Economic Advisors (GCEA)

The Governor's Council of Economic Advisors' (GCEA) national forecast has higher real growth and slightly higher inflation for 2024

In the GCEA scenario, the U.S. and state forecasts were adjusted to match the average view of the Council members.

The Governor's Council of Economic Advisors' (GCEA) national forecast has higher real growth and slightly lower inflation in 2025 and 2026 than our baseline forecast. The GCEA real GDP growth forecast averages 2.1% per year for 2024 through 2029, compared with our 2.0% per year rate. Their forecast of 2.0% average real consumer spending growth is slightly lower than our 2.1% average growth rate. The GCEA members' personal consumption expenditures (PCE) inflation forecast averages 2.4% per year which is slightly higher than the 2.3% average rate in our forecast. The Council members' mortgage rate forecast averages 5.8% over the six-year forecast horizon, slightly above our average mortgage rate forecast of 5.4%. The GCEA Brent oil price forecast averages \$81 per barrel which is higher than our \$75 average Brent oil price.

The Governor's Council of Economic Advisors' Washington forecast is similar to our baseline forecast The Governor's Council of Economic Advisors' Washington forecast is similar to our baseline forecast. The GCEA scenario for Washington real personal income growth averages 3.1% per year for 2024 through 2029, compared to our 3.1% average. The Council members' forecast for total employment growth over the six-year period averages 1.1% per year, compared with our 1.0% average growth. The Council members' forecast for manufacturing employment growth over the six-year period averages 0.5% per year compared to our 0.1% average growth rate. The Council members' forecast for construction employment growth over the six-year period averages 2.8% per year compared to our 2.9% average growth rate. The GCEA housing permit forecast averages 43,000 units per year compared to our forecast of 42,000 units per year.

Table 2.3 compares the Governor's Council of Economic Advisors' forecast with the baseline forecast.

Chapter 3: Washington State Revenue Forecast Summary

- Tracked revenue collections since February have come in close to their forecasted amounts.
- The June economic forecast of state personal income is lower through FY 2025 but higher in the following fiscal years. The forecast of housing permits is lower in all fiscal years. This has resulted in slight decreases in forecasted Revenue Act taxes in the current and next biennia and slight increases in the 2027-29 biennium.
- Forecasted real estate excise taxes have increased slightly due to higher-thanexpected taxable activity.
- Net receipts of capital gains taxes in FY 2024 were much lower than those of FY 2023 and have prompted a lower forecast going forward.
- Legislative and budget-driven revenue changes from the 2024 legislative session produced slight decreases in the current and next biennia and slight increases in the 2027-29 biennium.
- The forecast of funds subject to the budget outlook process was decreased by \$477 million in the 2023-25 biennium and \$189 million in the 2025-27 biennium but increased by \$96 million in the 2027-29 biennium.

Overview

Revenue collections have come in close the forecast but the economic forecast is slightly weaker than the previous forecast in the near term

Total tracked revenue collections since February have come in close to their forecasted amounts. The June economic forecast projects slightly lower personal income than expected in February in FY 2024 and 2025 but higher income in fiscal years 2026 through 2029. Projected housing permits, however, are lower throughout the forecast period. These factors, along with observed recent activity, have resulted in decreases in forecasted Revenue Act taxes through fiscal year 2027 and slight increases thereafter. Forecasted real estate excise taxes have increased slightly due to the higher-than-expected taxable activity and lower forecasted mortgage rates. Net receipts of capital gains taxes in FY 2024 were much lower than those of FY 2023 and have prompted a lower forecast going forward. Legislative and budget-driven revenue changes from the 2024 legislative session produced slight decreases in the current and next biennia and slight increases in the 2027-29 biennium.

Total forecast change by biennium (millions):

23-25: -\$477 25-27: -\$189 27-29: +\$96

Table 3.1 summarizes the changes to forecasted revenue in funds subject to the budget outlook process for the 2023-25 and 2025-27 biennia. Forecasted revenue was decreased by \$476.7 million in the 2023-25 biennium and \$189.0 million in the 2025-27 biennium but increased by \$96.1 million in the 2027-29 biennium. A portion of the forecast revision was due to legislation and budget-driven revenue changes from the 2024 session. These changes subtracted \$33.9 million in expected revenue from the current biennium and \$36.9 million from the next biennium but added \$33.8 million to revenue for the 2027-29 biennium. The June 2024 forecast for funds subject to the budget outlook process total \$66,528.4 million in the 2023-25 biennium, \$71,532.2 million in the 2025-27 biennium and \$77,044.4 million in the 2027-29 biennium.

June forecast bv biennium

(\$billions):

2023-25: \$66.528

2025-27: \$71.532

2027-29: \$77.044

The budget outlook process ensures the current biennial budget will be sustainable in the next biennium

Though the ratio of total collections to income has increased from the FY 2015 trough, it is expected to peak in FY 2023

Table 3.1: Revisions to the forecast of funds subject to the budget outlook*

	2023-25 Biennium	2025-27 Biennium	2027-29 <u>Biennium</u>
Non-Economic Change	(\$33.9)	(\$36.9)	\$33.8
Forecast Change	(\$442.8)	(\$152.1)	\$62.3
Total Change	(\$476.7)	(\$189.0)	\$96.1

(*cash basis, millions of dollars)

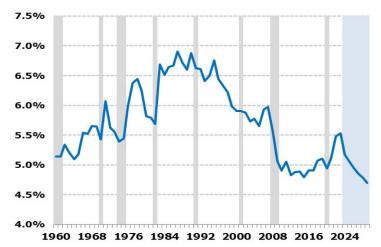

The budget outlook process ensures that the budget adopted for the current biennium will also be sustainable in the next biennium given forecasted revenue. The funds that are currently included when establishing the outlook are the General Fund-State, the Education Legacy Trust Account, the Washington Opportunity Pathways Account and the Workforce Education Investment Account. Once funded, the planned Fair Start for Kids Account will also be subject to the outlook. The recent history and forecast of these funds can be found in Table 3.17.

Figure 3.1 shows the ratio of revenue collected for funds subject to the budget outlook relative to state personal income. Through FY 2005, the revenue represented in the chart is what is currently defined as GF-S revenue. From FY 2006 onward the revenue includes the Education Legacy Trust Account (ELTA), which in its early years was wholly funded by the estate tax and a portion of the cigarette tax. From FY 2011 onward, the total includes the Washington Opportunity Pathways account (OPA), which is funded by Lottery receipts. From FY 2020 onward the total includes the Workforce Education Investment Account (WEIA), funded by a surtax on large service providers and companies that involve advanced computing. As can be seen in the chart, the ratio of revenue to income followed a downward trend from FY 1995 to FY 2015, broken only by the housing boom that raised the ratio from 2005 to mid-2008, and by temporary taxes and transfers of funds from non-GF-S sources

into the GF-S that again boosted the ratio in FY 2011. While the ratio grew slightly in FY 2016 and FY 2017, it increased rapidly in FY 2018 and FY 2019 when the state property tax levy increased to partially displace local levies and increased further in FY 2020 with the establishment of the graduated real estate excise tax. The pandemic-related booms in real estate and spending on goods, coupled with the new WEIA surtax, increased the ratio further in FY 2021 and FY 2022, and the new tax on certain capital gains increased the ratio further in FY 2023. From FY 2024 onward, however, total revenues are expected to grow at a rate lower than the rate of income growth, causing the ratio to continue its pre-FY 2015 downward trend through FY 2029.

Figure 3.1: Funds subject to the budget outlook as a Percentage of State Personal Income (Fiscal Years)

Total revenue relative to state personal income has generally been increasing since 2015 but is expected to decline after FY 2023

Source: ERFC, data through fiscal year 2023. Gray shaded area indicates recession; blue shaded area indicates forecast.

Track Record for 2023-25 and 2025-27 Biennial forecasts

The forecast for the current biennium is \$787 million higher than was forecasted at the time of the initial 2023-25 budget

Table 3.10 summarizes the historical changes to the forecast of funds subject to the budget outlook for the 2023-25 biennium and Table 3.11 tracks changes to the 2025-27 forecast. The February 2020 forecast was the initial forecast for the 2023-25 biennium. The current forecast of total revenue is \$6.69 billion (11.2%) higher than the initial forecast. Non-economic changes have increased the forecast by \$0.59 billion (1.0%). Excluding non-economic changes, the current forecast is \$6.09 billion (10.2%) higher than the initial forecast. The March 2023 forecast, coupled with a \$287 million revenue increase from legislative and budget-driven revenue changes passed in the 2023 legislative session after the March forecast, was the basis for the initial budget for the 2023-25 biennium. The current forecast of biennial revenue is \$787 million (1.2%) higher than that sum. The February 2022 forecast was the initial forecast for the 2025-27 biennium. The current forecast for the biennium is \$1.51 billion (2.2%) higher than the initial forecast.

Recent Collection Experience

Tracked collections were \$14 million (0.1%) higher than forecasted in February

GF-S revenue collections from the Department of Revenue (DOR) and the Washington court system are tracked monthly. In the period since the February forecast, total revenue from the above sources came in \$13.8 million (0.1%) higher than expected (see Table 3.2). Revenue Act collections reported by the DOR were \$40.1 million (0.6%) lower than forecasted and revenue from other DOR tax sources was \$52.3 million (0.9%) higher than forecasted.

Table 3.2: Pre-Forecast Collection Variance of Major General Fund-State Taxes by Agency (relative to the February forecast, cash basis, millions of dollars)

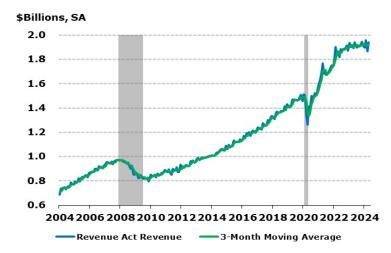

Agency/Source Department of Revenue	Collection <u>Variance</u>	Percent of <u>Estimate</u>
Revenue Act	(\$40.1)	-0.6%
Non-Revenue Act	\$52.3	1.9%
Subtotal	\$12.2	0.1%
Washington court system	\$1.6	10.3%
Total* * Detail may not add to total due	\$13.8 e to rounding.	0.1%

^{*} Detail may not add to total due to rounding. Source: ERFC; Period: February 11, 2023 - June 10, 2024

Non-Revenue Act DOR tax collections were higher than forecasted Property tax collections came in \$44.6 million (2.1%) higher than forecasted. Real estate excise tax (REET) came in \$17.1 million (5.7%) higher than forecasted. Cigarette tax collections came in \$8.6 million (10.8%) lower than forecasted and liquor sales and liter tax receipts came in \$5.8 million (5.5%) lower than forecasted. Net deposits of unclaimed property into the GF-S were \$24.5 million higher than forecasted. Revenue from all other DOR revenue sources came in \$19.5 million (14.4%) lower than forecasted. Revenue from the Washington court system was \$1.6 million (10.3%) higher than forecasted.

Figure 3.2: Revenue Act Collections*

Adjusted total collections over the last four months were up 0.9% year over year

Source: ERFC; Data through June 10, 2024 *Adjusted for large payments/refunds, payment pattern changes and deferred payments

Adjusted Revenue Act collections were up 0.03% year over year for first quarter 2024 activity after 1.0% growth in Q3 and O4 of 2023 Figure 3.2 shows seasonally adjusted Revenue Act receipts excluding payments received under the tax amnesty program in early 2011 and other large payments. It is also adjusted for past changes in payment patterns and deferred payments in the first half of 2020. As shown in the figure, growth in collections began to slow in 2023. While seasonally adjusted collections have shown occasional month-to-month declines, year-over-year quarterly growth has remained low but positive. Adjusted collections for first quarter 2024 activity (February 11 - May 10, 2024 collections) were up only 0.03% year over year. Adjusted collections for third guarter 2023 activity (August 11 – November 10, 2023 collections) and fourth quarter 2023 activity (November 11, 2023 - February 10, 2024) were both up 1.0% year over. Adjusted collections for March 2024 activity were down 3.4% year over year while collections for April 2024 activity were up 3.4% year over year. Total adjusted collections in the four months since the last forecast were up 0.9% year over year.

Real estate activity has been higher than forecasted in February Taxable real estate activity has been higher than the February forecast. Sales of property valued below \$10 million saw declines starting in the middle of 2023 but began to rebound in January and have since fluctuated around a higher level (see Figure 3.3). Large commercial sales (sales greater than \$10 million) are a bit lower than their usual levels, averaging \$450 million per month over the last four months.

Figure 3.3: Taxable Real Estate Excise Activity, SA

Source: ERFC estimates through May 2024

Legislative and Budget-Driven Revenue Changes to the Forecast

Legislative and budget-driven revenue changes produced a relatively small net decrease in expected revenue

Table 3.20 summarizes the legislative and budget-driven revenue changes to the forecast from bills passed in the 2024 legislative session. The total effect of these changes, as summarized in Table 3.1 above, are relatively small. The largest impacts came from tax exemptions and deferrals and budget driven revenue changes to the distribution of Liquor and

Cannabis Board funds. Changes to the forecast resulting from new legislation are discussed in the relevant revenue source sections.

General Fund-State Revenue Forecast by Source

The GF-S is the largest of the funds subject to the budget outlook The General Fund-State (GF-S) is the largest of the funds subject to the budget outlook, consisting of most of the commonly paid state taxes. The history and forecast of nominal and real GF-S revenue by biennium can be found in Table 3.3. GF-S forecast changes by agency and major revenue classification for the 2023-25 biennium can be found in Table 3.5 (cash) and Table 3.6 (GAAP). Forecast changes for the 2025-27 biennium can be found in Table 3.7 (cash) and Table 3.8 (GAAP). The GF-S forecast by fiscal year and major source category through FY 2025 can be found in Table 3.9.

Department of Revenue

Taxes collected by DOR make up most of GF-S revenue The Department of Revenue (DOR) collects and administers most of Washington's GF-S revenue, accounting for 95.3% of estimated total GF-S revenue in FY 2023. The largest tax sources administered by the DOR are the retail sales tax, business and occupation tax, property tax, use tax, cigarette tax and real estate excise tax. The revenue forecasts discussed below can be found in Tables 3.5-3.8.

Figure 3.4: Taxable Sales* as Percentage of State Personal Income

The ratio of taxable sales to state personal income has been on a declining trend historically

*Past tax base adjusted to represent current base. Gray shaded area Indicates recession, blue shaded area indicates forecast. Source: ERFC; Data through FY23, forecast through FY29

Retail sales taxes are the largest source of GF-S revenue The retail sales tax is the largest source of GF-S revenue, accounting for 47.8% of GF-S revenue in FY 2023. The state's share of the tax is 6.5% of the sales price. While construction labor, repair services, and some other services are taxed, the tax does not apply to most services. As can be seen in Figure 3.4, taxable sales as a share of personal income has long been on a declining trend. The share fell even more sharply than the

previous trend from the 2008 recession through FY 2012. In that year, 34.1% of personal income was spent on taxable items and services, the lowest percentage on record. Increased spending on construction and autos, along with legislative changes to services and companies deemed taxable, including online sales, caused the share to grow to 37.4% of personal income by FY 2019. The COVID-19-related collapse in late FY 2020, coupled with federal emergency income support, caused the ratio of sales to income to dip in FY 2020. In the last months of FY 2020 and continuing into FY 2021, however, the trend of increasing purchases of nontaxable services reversed due to pandemic-related shutdowns of services and stimulus payments to households. With the limited availability of services, consumers opted to buy goods. Car sales and construction activity also increased. These trends continued into FY 2022, which, coupled with a slowdown in FY 2022 income growth after the stimulus-boosted income levels of FY 2021, caused the ratio of sales to income to jump to 38.1%. While taxable sales growth slowed in FY 2023, they still grew slightly faster than personal income, causing the ratio to increase to 38.4%. After FY 2023, however, the ratio is forecasted to continue its historical downward trend through FY 2029 as income once again grows faster than taxable sales. Forecasted and historical taxable retail sales by fiscal year can be found in Table 3.4.

New
legislation
has reduced
expected
retail sales
tax receipts
by \$61.5
million

As can be seen in Table 3.20, there were four new laws passed in the 2024 legislative session that impacted the retail sales tax. All of the laws reduced expected collections. The largest reduction came from deferral of sales taxes on improvements to the SR 520 corridor, which reduced expected collections by \$56.2 million through FY 2029. Altogether, the four laws reduced expected retail sales tax collections by a total of \$61.5 million through FY 2029.

Retail sales tax receipt growth forecast:

FY24: 0.5% FY25: 3.9% FY26: 4.0% FY27: 4.3% Growth in FY 2019 taxable activity was relatively strong at 7.6%. Taxable activity growth slowed to 1.0% in FY 2020 due to pandemic-related shutdowns in the latter part of the year, but then rebounded by 11.1% in FY 2021 and 11.2% in FY 2022, supported by rising inflation. Growth slowed to 5.7% in FY 2023 and is expected to slow further to 0.5% in FY 2024. Growth is then forecasted to increase to 3.5% in FY 2025, 4.1% in FY 2026, 4.2% in FY 2027, 3.8% in FY2028 and 3.7% in FY 2029. (see Table 3.4). Due to the lag between taxable activity and collections and the presence of tax deferrals, credits, refunds, and payments of past due taxes, the growth in actual collections differs from the growth in taxable activity. Growth in collections for FY 2020 was 1.7% and growth in FY 2021 was 10.3%. Collections increased by 12.4% in FY 2022, boosted by several large payments of past-due taxes and one large early payment of deferred taxes, and increased by 5.7% in FY 2023. Collections growth is forecasted at 0.5% in FY 2024, 3.9% in FY 2025, 4.0% in FY 2026 and 4.3% in FY 2027 and 3.8% in FY 2028 and FY 2029.

Business and Occupation taxes are the second largest source of GF-S revenue The business and occupation (B&O) tax is the second largest source of GF-S revenue, accounting for 20.1% of GF-S revenue in FY 2023. It is a tax on the gross receipts of all businesses operating in Washington. The state portion of the tax applies ten different rates according to various classifications of business activities. In FY 2023, the largest contributor to total state B&O tax was the services sector, which had a gross tax rate of 1.5% and represented an estimated 45% of B&O taxes due. The next largest sector was retailing, which is taxed at 0.471% and represented an estimated 23% of taxes due, followed by the wholesaling sector, which is taxed at 0.484% and represented an estimated 20% of taxes due.

New legislation has reduced expected B&O collections by \$18.6 million As can be seen in Table 3.20, there were three new laws passed in the 2024 legislative session that impacted the B&O tax. One exempted certain sales of emissions credits from taxation, one expanded a credit, and one increased the expected usage of a preferential tax rate. Altogether, the three laws reduced expected B&O tax collections by a total of \$18.6 million through FY 2029.

B&O tax growth forecast:

FY24: 2.7% FY25: 2.0% FY26: 5.1% FY27: 5.4% In FY 2019, B&O tax receipts grew by 6.9%. Despite a second quarter collapse in activity, FY 2020 growth remained positive at 3.6% followed by growth of 7.9% in FY 2021. Collections grew 14.5% in FY 2022 due to both strong activity and the receipt of several large one-time payments of past-due taxes. Strong activity continued in FY 2023, bringing collections growth of 9.8%. Growth is expected to slow to 2.7% in FY 2024 and 2.0% in FY 2025 but then accelerate to 5.1% in FY 2026, 5.4% in FY 2027 and 4.4% in FY 2028 and FY 2029.

State property taxes are the third largest source of GF-S revenue The state property tax levy is the third largest source of GF-S revenue, accounting for 14.5% of total revenue in FY 2023. Although the tax goes into the GF-S, it is dedicated to the funding of basic education. As discussed in the September 2017 forecast publication, the total amount of the state levy was increased by new legislation in June 2017, with the increases beginning in FY 2018.

Property tax growth forecast:

FY24: 2.3% FY25: 2.5% FY26: 2.4% FY27: 2.3% Constrained by prior law to a levy growth rate of one percent on existing property (or the rate of inflation if less than one percent), property tax collections grew by 1.9% in FY 2017. The first payments of the additional state levy began to arrive in the latter half of FY 2018, bringing total GF-S property tax growth of 31.4% for the fiscal year. Collections fell by 12.4% in FY 2019 due to a temporary reduction in the levy rate for calendar year 2019 and a \$936 million transfer of collections from the levy to the Education Legacy Trust Account (ELTA). Collections rebounded by 44.2% in FY 2020 due to a smaller \$83.8 million transfer to ELTA and the end of the temporary levy reduction in the second half of the year. FY 2021 collections grew by 27.3% due to a full year of collections at the unreduced levy rate along with the collection of some taxes that would have been collected in FY 2020 but were instead deferred due to the pandemic. Absent the extra payments from deferrals, growth slowed to

0.4% in FY 2022. Growth then increased to 1.5% in FY 2023. Collections growth is forecasted at 2.3% in FY 2024, 2.5% in FY 2025, 2.4% in FY 2026 and 2.3% in FY 2027 through FY 2029. Growth in property tax levies excluding new construction is once again restricted to the lesser of one percent per year or the rate of inflation beginning with the calendar year 2022 levy.

REET rates and distributions changed on January 1, 2020 The real estate excise tax (REET) was the fourth largest DOR source of GF-S revenue in FY 2023, accounting for 3.6% of total revenue. The tax is applied to both residential and commercial real estate, including purchases of vacant land. Prior to January 1, 2020, the state portion of REET was 1.28% of the sales price and was divided between the GF-S (92.3%), a fund for local public works (2.0%), a fund for assistance of cities and counties (1.6%) and ELTA (4.1%). As of January 1, 2020 rates were 1.1% for the portion of the selling price less than or equal to \$500 thousand, 1.28% for the portion greater than \$500 thousand and less than or equal to \$1.5 million, 2.75% for the portion greater than \$1.5 million and less than or equal to \$3.0 million and 3.0% for the portion greater than \$3.0 million (the rate thresholds were adjusted for inflation as of January 1, 2023 and will be adjusted every fourth year thereafter; current thresholds are \$525 thousand, \$1.525 million and \$3.025 million). The distributions of the tax are also changed: 79.4% is deposited in the GF-S, 1.7% in the Public Works Assistance Account, 1.4% in the City-County Assistance Account and the remainder (17.5%) in ELTA. Beginning July 1, 2023, distributions to the Public Works Assistance Account increased to 5.2% and distributions to the Education Legacy Trust Account decreased to 14%. The new rates and distributions were designed to result in increased collections for both the GF-S and ELTA.

GF-S REET growth forecast:

FY24: -14.9% FY25: 14.7% FY26: 9.4% FY27: 10.5% From FY 2013 through 2019, the recovery in the residential real estate market after the Great Recession has been accompanied by a boom in commercial real estate. Sales of large commercial properties began to weaken in FY 2019 while residential sales increased, resulting in a 0.5% increase in collections in FY 2019. In the first half of FY 2020, residential sales remained strong, and commercial sales surged in December 2019 ahead of the January 1, 2020 change in tax rates. The COVID-induced real estate market downturn that began with April 2020 collections, however, brought a total decline of 0.7% in FY 2020. Sales then began to boom in July 2020, with strength in both the residential and commercial markets, bringing collections growth of 34.4% in FY 2021 and 35.9% in FY 2022. In FY 2023, higher mortgage rates and unaffordable high prices in many areas caused both the number of transactions and prices to decrease, bringing a decline in REET receipts of 43.8%. Receipts are expected to decline a further 14.9% in FY 2024. Growth is then expected to resume at 14.7% in FY 2025, 9.4% in FY 2026, 10.5% in FY 2027, 8.5% in FY 2028 and 5.2% in FY 2029.

The state use tax was the fifth largest DOR GF-S revenue source in FY 2023 at 3.3% of total receipts. The state portion of the tax

Use tax was the fifth largest DOR GF-S source in FY 2023 is 6.5% of the purchase price for items used in the state that were not subject to the state retail sales tax. Examples of items subject to the state use tax are goods purchased out-of-state; online and mail-order purchases, where sales tax was not collected; or purchases of used vehicles from private individuals.

Use tax growth forecast:

FY24: -2.0% FY25: -2.5% FY26: 3.5% FY27: 5.0% Use tax collections grew 9.0% in FY 2019, boosted by several large one-time purchases. Despite strong collections in the first half of the fiscal year, FY 2020 collections declined by 4.9%. Collections increased by 16.1% in FY 2021 and 7.4% in FY 2022 due to record high used car sales. While used car sales have moderated, large payments from other sectors increased growth to 12.6% in FY 2023. As taxable use tax activity returns to trend after FY 2023's elevated levels, collections are expected to decrease by 2.0% in FY 2024 and 2.5% in FY 2025. Growth then continues at 3.5% in FY 2026, 5.0% in FY 2027, 4.4% in FY 2028 and 4.3% in FY 2029.

Public utility taxes were the sixth largest DOR GF-S source in FY 2023 Public utility taxes were the sixth largest DOR source of GF-S revenue in FY 2023, bringing in 1.8% of total receipts. The tax applies to the gross income of sales to consumers by public and privately owned utilities and is in lieu of the B&O tax. The largest source of public utility taxes is the 3.873% tax on the distribution and generation of electrical power, followed by the 3.852% tax on the distribution of natural gas.

Two new laws impacted the public utility tax forecast

As can be seen in Table 3.20, there were two pieces of legislation in the 2024 session that impacted the public utilities tax. The bill that had the most impact was HB1976, which was designed to increase the use of a previously adopted credit that was expected to reach its mandated cap of \$75 million in FY 2029. The cap is now expected to be reached in FY 2027 so the credit will expire in that year. This has reduced expected collections by a cumulative \$47.3 million in FY 2025 through 2027 and increased collections by a cumulative \$37.5 million in FY 2028 and 2029.

Growth forecast:

FY24: -2.1% FY25: 3.8% FY26: 4.1% FY27: 5.6% Public utility tax receipts grew by 0.3% in FY 2020. The expiration of a large tax credit plus growth in natural gas and electricity use increased collections by 4.2% in FY 2021. The resumption of business activities plus increases in utility prices boosted growth to 16.3% in FY 2022. Further increases in utility prices brought growth of 12.4% in FY 2023. Utility price moderation and a slowdown in economic growth are expected to bring a decline in receipts of 2.1% in FY 2024 before growth resumes at 3.8% in FY 2025, 4.1% in FY 2026, 5.6% in FY 2027, 3.3% in FY 2028 and 3.5% in FY 2029.

Taxes on sales of spirits were the seventh largest DOR GF-S source in FY 2023 State taxes on sales of spirits were the seventh largest DOR GF-S revenue source in FY 2023 at 1.1% of total receipts. Spirits sales are taxed by both volume and price. The total tax rate by volume is \$3.7708 per liter. Liter tax receipts are deposited wholly into the GF-S. The price-based spirits tax is split between the GF-S (65% of receipts) and the Liquor Excise Tax fund (35%)

of receipts). The overall tax rate on sales to consumers is 20.5% of the sales price and the overall rate on sales to restaurant licensees is 13.7%.

Sprits tax growth forecast:

FY24: -2.1% FY25: -2.9% FY26: 0.4% FY27: 1.0% Total tax collections on spirits sales grew 5.2% in FY 2019. During the pandemic, spirit sales increased, with total tax collections growing by 8.2% FY 2020 and 9.9% in FY 2021. Collections increased a further 1.8% in FY 2022 and 1.5% in FY 2023. Collections are forecasted to decrease by 2.1% in FY 2024 and 2.9% in FY 2025 before returning to growth of 0.4% in FY in FY 2026 and 1.0% in FY 2027 through FY 2029.

The cigarette tax was the eighth largest DOR GF-S source in FY 2023 The state tax on cigarettes was the eighth largest DOR GF-S revenue source in FY 2023 at 0.9% of total receipts. Prior to FY 2010, the tax made up a much smaller portion of GF-S revenue because much of the tax was dedicated to non-GF-S accounts. In FY 2010, all of the tax except the portion dedicated to the Education Legacy Trust account was redirected to the GF-S, and in FY 2011 all of the cigarette tax was redirected to the GF-S. The current tax rate, which took effect May 1, 2010, is \$3.025 per pack of 20 cigarettes.

Cigarette tax growth forecast:

FY24: -9.1% FY25: -1.3% FY26: -3.3% FY27: -3.1% The total number of taxed cigarettes has been on a downward trend due to a continuing decline in the number of smokers. Recently, the rate of decline has increased. Collections decreased by 3.3% in FY 2019 after decreasing by 5.4% in FY 2018. The decrease in collections accelerated to 6.0% in FY 2020, partially due to a state increase in the legal age to purchase cigarettes from 18 to 21 that took effect on January 1, 2020. Collections declined 2.4% in FY 2021 and 2.1% in FY 2022 before plunging by 12.0% in FY 2023. Collections are forecasted to continue to decline by 9.1% in FY 2024, 1.3% in FY 2025, 3.3% in FY 2026 and 3.1% in FY 2027. Collections are expected to decline by 3.5% in FY 2028 and 4.1% in FY 2029.

Forecasted Revenue from Cannabis-Related Sales

Sales of cannabis products in state-licensed stores began in July 2014 Initiative 502, approved by voters in the November 2012 election, legalized the sale and use of recreational cannabis and cannabis products in Washington. The first legal sales of cannabis products in state-licensed stores occurred in July 2014. During the 2015 regular and special sessions, legislation was passed that substantially altered the market rules set up by the initiative. 2SSB 5052, passed during the regular session, brought previously unregulated medical marijuana dispensaries into the same regulatory regime as licensed recreational cannabis outlets. This legislation was outlined in our June 2015 forecast publication. After the June 2015 forecast, 2E2SHB 2136, passed in the second special session, changed the cannabis excise tax from a 25 percent tax collected from growers, processors and retailers to a 37 percent tax on retail sales only. The law also made changes to the distribution of tax and fee revenue. Cannabis taxes and license fees are collected by the Liquor and Cannabis Board (LCB) and are placed into a

dedicated fund with annual appropriations to various other accounts including the GF-S.

Change in GF-S forecast of total cannabis-related revenue by biennium (millions):

23-25: -\$17.5 25-27: -\$10.1 27-29: -\$8.2 Distributions of cannabis excise taxes to the GF-S totaled \$15.3 million in the 2013-15 biennium and \$147.6 million in the 2015-17 biennium. GF-S distributions were \$248.9 million in the 2017-19 biennium, \$361.0 million in the 2019-21 biennium and \$318.9 million in the 2021-23 biennium. As can be seen in Table 3.20, forecasted GF-S distributions were decreased by a new law that provided exemption from cannabis taxes for certain users of medical cannabis. The exemption subtracts an expected \$0.9 million in the current biennium, \$8.4 million in the next biennium and \$11.2 million in the 2027-29 biennium. Including the losses from the exemption, the forecast of transfers for the 2023-25 biennium has been decreased \$17.5 million to \$266.9 million due to lower-than-expected sales since February. The net forecast of GF-S distributions for the 2025-27 biennium has been decreased \$10.1 million to \$304.9 million and the forecast for the 2027-29 biennium has been decreased \$8.2 million to \$327.5 million. Details of the forecasted distributions from the account can be found in Table 3.18.

The Office of Financial Management (Other Agencies)

Forecast change by biennium (millions):

23-25: -\$8.9 25-27: -\$2.1 27-29: -\$4.4 The Office of Financial Management (OFM) is responsible for preparing General Fund-State revenue and transfer forecasts for all agencies excluding the Department of Revenue, the Liquor and Cannabis Board, the Insurance Commissioner, the Washington State Lottery, and the State Treasurer. The forecast of net GF-S revenue for the 2023-25 biennium was decreased \$8.9 million to -\$38.1 million, the forecast for the 2025-27 biennium was decreased \$2.1 million to -\$132.7 million and the forecast for the 2027-29 biennium was reduced \$4.4 million to -\$154.1 million. The negative value of projected revenue indicates that more funds will be transferred out of the GF-S by the agencies overseen by the OFM than will be transferred into the GF-S from those agencies during that biennium.

State Treasurer

Forecast change by biennium (millions):

23-25: \$22.3 25-27: \$82.2 27-29: \$49.6 The Office of the State Treasurer generates GF-S revenue by investing state short-term cash reserves. The forecast of GF-S revenue for the 2023-25 biennium has been increased \$22.3 million to \$644.9 million, the forecast of GF-S revenue for the 2025-27 biennium has been increased \$82.2 million to \$498.7 million and the forecast for the 2027-29 biennium has been increased \$49.6 million to \$356.3 million. The forecast increases were mainly due to expected higher average fund balances though forecasted effective interest rates also increased from FY 2024 through FY 2027.

Insurance Commissioner

Forecast change by biennium (millions):

23-25: -\$1.2 25-27: -\$1.3 27-29: -\$1.5 The Office of the Insurance Commissioner collects premium taxes on most classes of insurance sold in Washington State. These taxes are distributed to the GF-S and various accounts in support of fire services. As can be seen in Table 3.20, the forecast has been reduced by a new law that increased transfers of fire insurance premiums out of the GF-S and increased by a one-time change in budget-driven revenue in FY 2025. The net change in forecasted GF-S distributions for the 2023-25 biennium is a reduction of \$1.2 million, bringing the forecast to \$1,703.8 million. The forecast for the 2025-27 biennium has been decreased \$1.3 million to \$1,795.7 million and the forecast for the 2027-29 biennium has been decreased \$1.5 million to \$1,866.2 million.

Liquor and Cannabis Board

Forecast change by biennium (millions):

23-25: -\$27.2 25-27: -\$9.2 27-29: -\$7.0 The Liquor and Cannabis Board (LCB) collects fees from distributors and retailers on sales of spirits and surtaxes on sales of beer and wine (sales and liter taxes on sprits are collected by the DOR). The LCB is also responsible for the collection of excise taxes and fees associated with the legalized sale and use of recreational and medicinal cannabis discussed previously. As can be seen in Table 3.20, the LCB forecast has been impacted by several budget-driven revenue changes. While the changes subtracted \$2.5 million from expected revenue for the current biennium, they have added \$30.2 million in the next biennium and \$30.9 million in the 2027-29 biennium. The budget-driven increases for the next two biennia, however, have been outweighed by a forecasted reduction in distributor fees stemming from a reduction in expected liquor sales. The net change in the forecast of GF-S distributions from these factors is a \$27.2 million decrease in the current biennium, a \$9.2 million decrease in the next biennium and a \$7.0 million reduction for the 2027-29 biennium. Forecasted LCB transfers to the GF-S are now \$573.5 million for the 2023-25 biennium, \$650.6 million for the 2025-27 biennium and \$696.9 million for the 2027-29 biennium.

Lottery Commission

GF-S forecast change by biennium (millions):

23-25: \$3.4 25-27: -\$1.0

27-29: -\$0.7

While most of the proceeds from sales of lottery games go to the Washington Opportunity Pathways Account (OPA), distributions are also made to the Problem Gambling and Economic Development accounts. Details of the forecast of the distribution of Lottery earnings can be found in Table 3.15 on a cash basis and Table 3.16 on a GAAP basis. When total profits from all Washington-only games plus the Powerball game exceed \$102 million per year, the amount above \$102 million is transferred to the GF-S. The forecast of GF-S transfers for the 2023-25 biennium has been increased \$3.4 million to \$94.9 million, while the forecast for the 2025-27 biennium is has been decreased

\$1.0 million to \$73.9 million and the forecast for the 2027-29 biennium has been decreased \$0.7 million to \$74.0 million.

Washington Court System

Forecast change by biennium (millions):

23-25: \$2.4 25-27: \$2.8 27-29: \$1.7 The GF-S receives surcharges on certain filing fees, fines, and infraction penalties collected by the Washington court system. This revenue is transferred to the GF-S on a monthly basis. The forecast of GF-S transfers for the 2023-25 biennium has been increased \$2.4 million to \$103.1 million, the forecast for the 2025-27 biennium has been increased \$2.8 million to \$105.6 million and the forecast for the 2027-29 biennium has been increased \$1.7 million to \$106.6 million.

The Relationship between the Cash and GAAP General Fund-State Revenue Forecasts

GAAP forecasts are based on the period in which the revenue is earned rather than received Legislation enacted in 1987 requires that the state's biennial budget be in conformance with Generally Accepted Accounting Principles (GAAP). It also requires a GF-S revenue forecast on both a cash and GAAP basis. The GAAP forecasts of GF-S revenue for the 2023-25 and 2025-27 biennia are presented in Tables 3.6 and 3.8 and the GAAP forecast of Lottery revenue transfers for those biennia is in Table 3.15. The primary difference between the cash and GAAP forecasts is the timing of the receipt of revenue. On a GAAP basis, revenue is credited to the biennium in which it is earned even though it may not have been received. The cash forecast, on the other hand, reflects expected cash receipts during a fiscal period. The forecast on a GAAP, or accrual, basis is primarily used for financial reporting. The cash forecast is used for cash flow management and revenue tracking. The cash forecast is also the forecast used in the state's budgetary balance sheet, which is the principal tool for assessing the General Fund's current surplus or deficit position. References to the GF-S forecast in the text of this chapter refer to the cash forecast unless otherwise noted. Likewise, figures from revenue tables other than Tables 3.6, 3.8 and 3.16 are projected on a cash basis.

Alternative Forecasts for the 2023-25 and 2025-27 Biennia

Optimistic scenario (billions):

23-25: +\$2.40 25-27: +\$6.05

Pessimistic scenario (billions):

23-25: -\$2.64 25-27: -\$6.56 Chapter 2 outlines optimistic and pessimistic economic scenarios relative to the baseline economic forecast. The forecast assigns a probability of 55% to the baseline forecast, 20% to the optimistic scenario and 25% to the pessimistic scenario. The revenue implications of these alternative scenarios for the 2023-25 biennium are shown in Table 3.13 and those of the 2025-27 biennium are shown in Table 3.14. For the 2023-25 biennium, the optimistic forecast generates \$68.933 billion in revenue subject to the budget outlook process, \$2.404 billion (3.6%) more than the baseline scenario, while the pessimistic forecast produces \$63.890 billion in revenue, \$2.639 billion (4.0%) less than the baseline. For the 2025-27 biennium, the optimistic

forecast generates \$77.579 billion in GF-S revenue, \$6.047 billion (8.5%) more than the baseline scenario, while the pessimistic forecast produces \$64.968 billion in revenue, \$6.564 billion (9.2%) less than the baseline.

Washington Opportunity Pathways Account

OPA forecast change by biennium (millions):

23-25: -\$26.7 25-27: -\$30.8 27-29: -\$28.5 The Washington Opportunity Pathways Account (OPA) receives all profits (excluding statutory transfers) from Washington-only lottery games plus all profits from the Mega Millions game. Since February, lottery receipts have been coming lower than forecasted, which has reduced the outlook going forward. The forecast of OPA revenue for the 2023-25 biennium has been decreased \$26.7 million to \$367.4 million and the forecast for the 2025-27 biennium has been decreased \$30.8 million to \$345.0 million. Forecasted revenue for the 2027-29 biennium has been decreased \$28.5 million to \$364.6 million. As can be seen in Table 3.20, budget-driven revenue changes decreased the forecast by \$0.1 million in the current biennium but increased the forecast by \$0.3 million in the next biennium and \$0.5 million in the 2027-29 biennium.

Education Legacy Trust Account

ELTA forecast change by biennium (millions):

23-25: -\$188.1 25-27: -\$118.9 27-29: -\$46.7 The Education Legacy Trust Account (ELTA) was created in the 2005 legislative session, with revenue collection beginning in FY 2006. Funds from the account may only be used for support of the common schools, expanding access to higher education through funding for new enrollments and financial aid, and other educational improvement efforts. The ELTA is primarily funded by a tax on estates of over \$2 million. Legislation from the 2013 special session, however, added revenue from public utility (through FY 2023) and real estate excise taxes (REET), which had previously gone into non-GF-S accounts. Subsequent legislation also added revenue from solid waste taxes from FY 2016 - FY 2023 and a transfer of \$935 million from the additional property tax levy to the account in FY 2019. Forecasted revenue was further increased in the 2021 legislative session by ESSB 5096, which establishes a tax on certain transactions that produce capital gains above \$250,000. Forecasted ELTA revenue has been decreased in all three biennia due to a large reduction in forecasted capital gains tax revenue. While the tax brought in \$500 million in ELTA funds in FY 2023, reduced collections and large refunds have reduced expected receipts to \$363 million in FY 2024, a reduction of \$161 million form the February forecast. The forecasted reductions in the next five fiscal years are similar in magnitude. The reductions, however, were partially offset by large increases in forecasted estate taxes, which had been coming in well above previous forecasts, and slight increases in forecasted REET. The net forecast reductions were \$188.1 million in the 2023-25 biennium, \$118.9 million in the 2025-27 biennium and \$46.7 million in the 2027-29 biennium. Forecasted ELTA receipts are now \$1985.0 million for the 2023-25 biennium, \$2,259.4 million

for the 2025-27 biennium and \$2,549.1 million for the 2027-29 biennium.

Workforce Education Investment Account

WEIA forecast change by biennium (millions):

23-25: \$24.1 25-27: \$33.9 27-29: \$42.3 The Workforce Education Investment Account (WEIA) was created in the 2019 legislative session. The account, the purpose of which is to help fund the state's higher education system and student loans, was originally funded by a surcharge on specific industries that benefitted from an educated workforce. This tax was scheduled to take effect on January 1, 2020, and the Economic and Revenue Forecast Council was later tasked with forecasting revenue generated for the account. ESSB 6492, passed in early February of the 2020 legislative session, retroactively eliminated the existing surcharge and replaced it with a simplified version that is effective April 1, 2020. The simplified surcharge applies to businesses with gross taxable activity under the "services and other activities" category of \$1 million or more (with some nonprofit and other businesses exempt). In addition to this surcharge, which equals 0.25% of gross taxable income, another surcharge is applied to a group of "select advanced computing businesses," and is paid quarterly. WEIA revenue totaled \$779.0 million in the 2021-23 biennium. Forecasted revenue has been increased by \$24.1 million in the 2023-25 biennium, \$33.9 million in the 2025-27 biennium and \$42.3 million in the 2027-29 biennium. WEIA revenue is now forecasted at \$879.8 million in the 2023-25 biennium, \$943.8 million in the 2025-27 biennium and \$1,019.9 million for the 2027-29 biennium. The WEIA forecast by fiscal year is presented in Table 3.19.

Budgetary Balance Sheet for the 2023-25 Biennium

Forecasted total reserves are \$3.250 billion at the end of the 2023-25 biennium.

Table 3.12 shows the budgetary balance sheet for the 2023-25 biennium as prepared by the Office of Financial Management and the House and Senate fiscal committees. The balance sheet shows not only projected GF-S spending and resources but also total projected spending and resources for the GF-S plus the other main non-transportation state-funded accounts: the Education Legacy Trust Account (ELTA), the Washington Opportunity Pathways Account (OPA) and the Workforce Education Investment Account (WEIA). As shown in the table, the GF-S beginning fund balance for the 2023-25 biennium was \$4,184.7 million and the total beginning balance for GF-S, ELTA, OPA and WEIA combined was \$5,287.0 million. Based on the enacted biennial budget, the balance sheet projects total GF-S reserves of \$2,811.6 million at the end of the 2023-25 biennium and total reserves for the GF-S, ELTA, OPA and WEIA accounts of \$3,249.7 million.

^{*} Actual Base. Includes statutory and administrative changes to the tax base. Historical fiscal year data are from quarterly taxable sales reported by taxpayers on the state's Combined Excise tax return. Reported totals affected by enacted legislation. Major base changes include: exemption of off-premises food, beginning 1978:3 (fiscal 1979); extension of the sales tax base to off premises food (1982:2 to 1983:2); food again exempt 1983:3 (fiscal 1984); extension of the sales tax base to candy, gum and bottled water (September 1 - December 2, 2010); elimination of sales tax exemption for residential phone service (July 1, 2013); elimination of sales tax exemption for bottled water (July 1, 2017); extension of economic nexus to certain remote sellers (January 1, 2018).

* GDP Price Index for Personal Consumption Expenditures
Consumer Price Index for all Urban Consumers
+ Consumer Price Index for the Seattle-Tacoma-Bremerton, WA CMSA
Consumer Price Index and PCE Price Index values shown here are annual averages of seasonally adjusted quarterly data and may differ slightly from the annual values published by the Bureau of Labor Statistics and Bureau of Economic Analysis.

Glossary

Biennium: The state's two years budget cycle.

CPI: The Consumer Price Index for All Urban Consumers. The Bureau of Labor Statistics (BLS) updates the CPI monthly, surveying over 60,000 goods in 85 urban areas.

Tax Elasticity: A measure of how tax revenues respond to changes in personal income. If tax revenue elasticity is greater than one, a one percent change in personal income will be associated with more than a one percent increase in tax revenues. If elasticity is less than one, a one percent increase in personal income will be associated with less than a one percent increase in tax revenues.

Fiscal Year: The state's budget year. Washington State's fiscal year runs from July 1 through June 30. Fiscal year 2018, for example, ran from July 1, 2017 through June 30, 2018.

GAAP Basis: Generally Accepted Accounting Principles measure revenue in the period during which they accrue rather than the period in which they are received.

General Fund: Accounts for all financial resources and transactions not accounted for in another fund.

General Fund-State (GF-S) Revenue: Resources from state sources only, excludes federal monies. The general fund is the principal state fund supporting the operation of the state.

Implicit Price Deflator, PCE (IPD): The IPD for consumption is a by-product of the National Income and Product Accounts. It is derived by dividing current dollar (nominal) consumer expenditures by constant dollar (real) consumer expenditures.

Mortgage Rate: The average interest rate on 30-year conventional loan (as reported by Freddie Mac).

Near General Fund: All accounts included in the General Fund - State plus the Education Legacy Trust Account and the Washington Opportunity Pathways Account.

Non-Wage Income: Personal income other than from wages and salaries. The major components are: proprietor's income, transfer payments, and dividends, interest and rent.

Real GDP: Gross Domestic Production adjusted for the price level.

Revenue Act: Revenue Act taxes consist of the retail sales tax, use tax, business and occupation tax, public utility tax and tobacco products tax, plus penalty and interest payments associated with those taxes.

Personal Income: Income from wages and salaries; other labor income; proprietor's income; dividends, interest and rent; transfer payments; and a residence adjustment. It is reduced by employee contributions for social insurance.

Seasonally Adjusted: Adjusted for normal seasonal variations. Monthly statistics, such as the unemployment rate, are seasonally adjusted to make month-to-month comparisons possible.

Seasonally Adjusted Annual Rate: A rate for a given period that is typically less than one year, but that is computed as if the rate were for a full year and seasonally adjusted.

Nonfarm Payroll Employment: Civilian non-farm payroll employees. The self-employed, farm workers, members of the armed forces, private household employees, and workers on strike are excluded.
